

SYMPTOMS	CORRECTIVE ACTION	PARTIAL SERVICE PARTS
1. Poor flush.	A. Adjust the tank water level to match the waterline. B. Fully open the water supply shut-off valve. C. Clear obstructions from the trapway, jet, or bowl rim holes. D. Clear obstructions from the waste line.	 <p>78132 Trip Lever Nut 1057940 Valve Head 83143 Seal 87115** Trip Lever 52156 Hose Waterline 51261 Clip 1060198 Fill Valve 87998 Flush Valve 1057941 Locknut 85307 Washer 85655 Flapper 42398 Washer 42397 Nut 83996 Gasket</p> <p>**Finish/color code required.</p>
2. No flush.	A. Reconnect the flapper chain to the trip lever or flush valve. B. Adjust the flapper chain assembly to remove excess slack.	
3. The fill valve turns on/off by itself without the toilet being flushed, or it runs allowing water to enter the tank.	A. Adjust the flapper chain for proper slack so the flapper closes. B. Clean or replace the flapper if it is worn, dirty, or misaligned with the opening. C. Clean the area around the opening to allow the flapper to seal. D. Adjust tank water level if it is too high. E. Replace the fill valve if the valve float sinks.	
4. Tank takes excessive time to fill.	A. Fully open the water supply shut-off valve. B. Clean the valve inlet, valve head, or supply line. Flush the lines.	
5. There is excessive noise when the tank is filling.	A. Partially close the water supply shut-off valve if the water pressure to the toilet is too high. Check the toilet performance following any such adjustment. B. Remove dirt or obstructions from the valve head. Flush the lines.	
IMPORTANT: Use only genuine Kohler parts as shown to avoid property damage.		
If unable to correct the problem, contact Customer Service: 1-800-4-KOHLER (USA), 1-800-964-5590 (Canada), or www.kohler.com.
