ORION BELT 20W DRIVER

Description:

The 20 watt driver is a Class II power supply rated for operating LEDs. It features an universal voltage input and a 24volt output. The encapsulated electronics and inherent protection adds reliability to both the driver and LEDs connected. Use 18 gauge wire for remote installation up to a maximum of 120ft. National and local codes must be followed when mounting driver inside a junction box. Please contact manufacturer for further details.

Part Numbers:

70436   20W driver

Technical Specs:

100-240V AC, 50/60Hz input
24V DC output
20VA, 20W for 16ft max (White, Warm White, Blue, and Green)
20VA, 20W for 27ft max (Red and Amber)
 Operating temperature: -22°F to 140°F
Class II rated
Suitable for damp location
Short circuit protection
Overload protection
Over-voltage protection
Thermal protection
