Fixture Type:

Part Number:

ENZIS STRAIGHT TRACK

Description:

The light weight Enzis Straight Track is used when straight track is desired. The two aluminum rods in the track are more rigid than the standard Enzis track. Angles and curves may still be made with the Enzis Straight Track but the bending will be permanent. No tools are required to attach the full array of mounting hardware or fixture adaptors to the track. Enzis Track system can be suspended or semi-flush mounted and allows the use of Bruck Uni-Light fixtures and pendants.

Part Numbers:

140008bz

bronze, 96"

140008mc

matte chrome, 96"

Technical Specs:

Material: Plastic extrusion with tin plated copper conductor braiding

Note: Curves and angles made to the track are permanent, available in 8 ft. sections only, rigid rods for straight runs
