Part Number:

HIGH-LINE MOUNTING SET VARIO

Description:

The High-Line Mounting Set Vario includes most materials necessary to create an angled cable run. The added feature of the vario tightener is the ball joint which gives the screw tensioner a very high degree of angular freedom and allowing it to easily adapt to highly angled cable runs. The set includes two tightening elements, two cable holders, power feeds and power cable. Mounting set may be used for wall-to-wall or ceiling-to-wall applications, when used with ceiling supports.

Part Numbers:

150518ch chrome

150518mc matte chrome

Technical Specs:

Insulated from mounting surface
