Fixture Type:

Part Number:

HIGH-LINE POWER FEED

Description:

The High-Line Power Feed is a dual function element as a power feed and as a canopy cover over standard junction box. Direct connection to cable run to deliver low-voltage power from transformer, one set needed per circuit. Recommended placement near center of cable run. For use with 8 and 10 gauge power cable only, metal shaft may be field cut.

Part Numbers:

150505ch chrome
150505mc matte chrome

Technical Specs:

300W max capacity
Power feed cable included
