

## HIGH-LINE CROSS CONNECTOR

### Description:

The High-Line Cross Connector is necessary when two non-insulated cable runs are crossing each other, available in both conductive and non-conductive pieces. Connector creates a conductive bridge between the two cables, while the non-conductive connector prevents accidental contact between two cables. Cross connector is sold individually.

### Part Numbers:

<b>150512ch</b>	chrome, non-conductive
<b>150512mc</b>	matte chrome, non-conductive
<b>150513ch</b>	chrome, conductive
<b>150513mc</b>	matte chrome, conductive

### Technical Specs:

3/8" cable separation
