BRUCK.

HIGH-LINE ISO TIGHTENING SET

Description:

The High-Line Iso Tightening Set is a wall fastener for cable runs. An isolating piece located in the center prevents current from passing through the tightener. Installed properly into a firm wall base, the iso tightening set pulls the copper cable when the center is turned. The tightening elements are attached to the wall with two mounting screws. Tightening set may also be used in conjunction with mounting supports to create ceiling mount applications.
Part Numbers:

150524ch   chrome

150524mc   matte chrome

Technical Specs:

Not insulated from mounting surface

4 1/8" - 5 7/10"   3/5"
