

900 SERIES SUPER RIGID PARALLEL ARM

INSTALLATION INSTRUCTIONS FOR
CAL-ROYAL 900 SERIES DOOR CLOSERS
(HOLD-OPEN & NON HOLD-OPEN TYPE)

MODEL NO SPAS/900 (NON HOLD-OPEN)

HOSRPS/900 (HOLD-OPEN)

GENERAL DESCRIPTIONS

The 900 series closers are non-handed for right or left hand doors designed to meet entrance accessibility requirements. The 900 series are spring power adjustable for all exterior/interior doors up to 58" (1470mm) wide doors and up to 330 Lbs (150Kg) weight.

Adjust the spring power before installing the door closer according to the "POWER ADJUSTMENT CHART FOR DOOR SELECTION" as shown on page 4.

The 900 series closers are installed BACK CHECK function as a standard which is essential to the proper operation of the SUPER RIGID PARALLEL ARM. Use just enough to prevent arm from striking stop with impact.

The delayed action (optional) function can not be used for this arm because this arm permits maximum 100° door open angle.
