

<b>Door Thickness</b>	1 3/8" – 2 1/2"
<b>Spindle Type</b>	Flat Spring loaded spindle
<b>Body Material</b>	Zinc Alloy
<b>Non Handed</b>	Lock will fit doors hung on the left or right
<b>Latch</b>	Light duty with stainless steel latchbolt head, with "anti-shim" plunger, 2 3/8" (60mm) backset requires 1" hole, 3 1/4" deep
Cylinders may be ordered Keyed Alike on request. Neoprene seals or metallic cover plates are included on both sides to provide friction against the face of the door, to avoid damage from over tightening of the fixing bolts, or to cover existing lock installation holes. CL200 is suitable for internal and external use.
