FEATURES:

When you're named for Henry VIII's Master of the Jewel House, you have a thing or two to prove. Our Cromwell Chandelier has no trouble in living up to the designation. That's because the illumination wafting through the off-white shantung shade makes faceted shadows on surrounding surfaces when it eclipses the ribbed lines of the metal frame. We've treated the wrought iron to a new gold leaf finish to enhance the chandelier's jewel-like feel.
