## Electronic Line Voltage Thermostats

DWT431W-P 7-Day Programmable **Electronic Thermostat** 

**DWT431W Electronic Thermostat** 

The Dimplex Electronic Line Voltage Thermostats offer precise temperature control which saves energy & improves comfort. They have large back-lit displays with back-up memory. Manual, precise temperature control can be displayed in either Celsius or Fahrenheit with temperature settings ranging from +5°C to + 35°C (41°F to 95°F). These easy-to-use thermostats are also equipped with variable duty cycles for proportional heating. Available in programmable and non-programmable models, these thermostats are ideal for use with linear and panel convectors, electric baseboards, fan-forced heaters, and radiant heaters.

## **Specifications**

	Cat. No.	Description	Rating	Maximum Load
	DWT431W	Electronic Thermostat Non-Programmable	120V-240V AC, 60Hz	15A, 4000W @ 240V, 2000W @ 120V
	DWT431W-P	Electronic Thermostat 7-Day Programmable	120V-240V AC, 60Hz	15A, 4000W @ 240V, 2000W @ 120V

## **Features:**

- · Precise temperature control, accurate to 0.5°C (0.9F)
- · Variable duty cycles for convection or fan-forced heaters
- TRIAC silent switching
- · Energy performance certified (CSA C828)
- Backlit display
- Setting range from +5°C to + 35°C (41°F to 95°F)
- · Temperature display in Celsius or Fahrenheit
- · Built-in surge protection
- Surface mount for easy installation
- · CSA certified for use in Canada and the U.S.
- · 2-year warranty

## Programmable Model:

- Memory backup for settings
- 7-day, 4 daily event programming
- Pre-start programming reaches set temperature on time
