Introduction

This manual contains a complete listing of T-Series (Grade 1) cylindrical lock parts and assemblies manufactured by the Falcon Lock Company. This edition lists components of T-Series locks manufactured after July 2007.

Exploded views of each lock chassis and trim assemblies are provided with an accompanying chart to identify parts for replacement purposes. In addition, this manual provides general cylinder information, many auxiliary components of the T-Series cylindrical locks and installation instructions.

Standard Features*

Certifications	ANSI A156 .2, Series 4000, Grade 1, UL Listed for 3-hour fire door.
Latch	1 $\frac{1}{8}$ " x 2 $\frac{1}{4}$ ", Square corner faceplate, 1" housing diameter, $\frac{1}{2}$ " throw.
Strike	$\frac{1}{4}$ " x 4 $\frac{7}{8}$ ", ANSI, Square corner, no box.
Backset	2 $\frac{3}{4}$ "
Cylinder	6-Pin solid brass, keyed 5-pin, Falcon G keyway, keyed different (KD)
Door Range	1 $\frac{3}{4}$ " – 2 $\frac{1}{8}$ " standard
Keys	Two nickel silver cut keys per lock, keyed 5-pin, Falcon G keyway

* Locks are furnished with standard features unless otherwise specified.

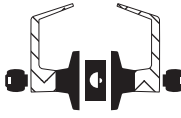

Lock Assembly Drawing Index

The Lock Assembly Drawing Index provides visual representations and textual descriptions of available functions. Page numbers for full trim and chassis drawings are referenced.

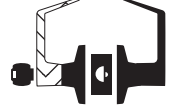

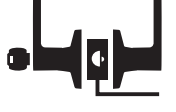

Lock Assembly Index

Function		ANSI A156.2, 1996, Series 4000, Grade 1			Trim	Chassis	
FALCON	ANSI	DESCRIPTION	OUTSIDE FUNCTION	INSIDE FUNCTION			
T101	F75	Passage/Closet Latch	Lever is always unlocked.		Lever is always unlocked and is always free for immediate egress.	27	3
T291		Privacy Hospital Lock	Unlocked from outside by turning emergency turn-button.		Push-button locks outside lever. Turning inside lever or closing door releases button. Inside lever is always free for immediate egress.	28	4
T301	F76	Privacy Lock	Can be opened from outside with small screwdriver or emergency release tool.		Push-button locks outside lever. Turning inside lever or closing door releases button. Inside lever is always free for immediate egress.	29	4
T351		Closet Lock	Can be locked with key.		Knurled knob free for immediate egress unless outside lever locked with key.	30	5 6 (IC)
T381	F88	Classroom Security Lock	Outside lever locked or unlocked by key in either lever.		Key locks or unlocks outside lever. Inside lever is always unlocked and is always free for immediate egress.	31	7 8 (IC)
T411	F87	Asylum Lock	Lever is fixed. Entrance by key only.		Lever is fixed. Exit by key only.	32	9 10 (IC)
T501	F82	Entry Lock	Lever is unlocked with key when push-button is pushed.		Push-button locks outside lever. Turning inside lever releases button. Inside lever is always free for immediate egress.	33	11 12 (IC)
T511	F109	Entry/Office Lock	Key retracts latch when button pushed and turned. Lever is unlocked with key when push-button is pushed.		Turn/push-button: pushing and turning button locks outside lever until manually unlocked. Push-button: pushing button locks outside lever until unlocked by turning inside lever. Inside always free for immediate egress.	34	13 14 (IC)

NOTE: Any function with deadlatch locks latchbolt when door is closed.

Lock Assembly Index

Function		ANSI A156.2, 1996, Series 4000, Grade 1			Trim	Chassis	
FALCON	ANSI	DESCRIPTION	OUTSIDE FUNCTION	INSIDE FUNCTION			
T521	F81	Office Lock	Key retracts latch when button turned.		Turning button locks outside lever until manually unlocked. Inside always free for immediate egress.	35	15 16 (IC)
T561	F84	Classroom Lock	Outside lever locked or unlocked by key.		Inside lever is always unlocked and always free for immediate egress.	36	17 18 (IC)
T571	F90	Dormitory Lock	Locked or unlocked by key. When locked by key it can only be unlocked by key.		Push-button locks outside lever. Turning lever or closing door releases button. Inside lever is always unlocked and is always free for immediate egress.	37	19 20 (IC)
T581	F86	Storeroom Lock	Lever is fixed. Entrance by key only.		Inside lever is always unlocked and is always free for immediate egress.	38	21 22 (IC)
T851		Storeroom Lock (Electrified – Fail Safe)	Lever is continuously locked electrically. Unlocked by switch or power failure. When locked, key retracts latch.		Inside lever is always unlocked and is always free for immediate egress.	39	23 24 (IC)
T881		Storeroom Lock (Electrified – Fail Secure)	Lever is continuously locked mechanically until unlocked by electric current. When locked, key retracts latch.		Inside lever is always unlocked and is always free for immediate egress.	40	25 26 (IC)

NOTE: Any function with deadlatch locks latchbolt when door is closed.

Sargent 6 & 10 Line	030997-001-30	030997-003-30	030997-005-30
Yale 1801, 5801	030917-001-30	030917-003-30	030917-005-30

*Assa 65611 and 65661, Corbin Russwin 2000-034 and Schlage (including Primus) all use Falcon 6-pin tailpiece.

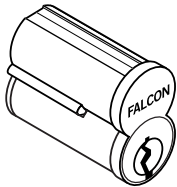

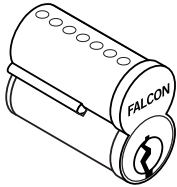

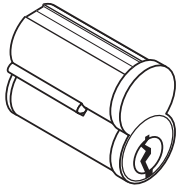

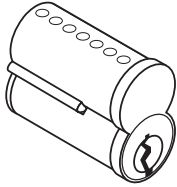

Competitor Keyway Compatibility

Falcon T-Series locks are furnished with Falcon's standard "G" keyway cylinder unless otherwise specified. The following cylinders manufactured by competitors are acceptable.

- Assa (65611 or 65661) 6-pin
- Sargent (6,7 and 10 Line) 6-pin
 - Keso not available
- Peaks (Kaba) 6-pin
- Medeco (20W200V3) 6-pin
 - Tailpiece supplied by Medeco
 - Falcon/Schlage style
- Schlage Standard 6-pin
- Schlage Primus 6-pin
- Yale (1801) 6-pin
 - Bicentric not available
- Corbin Russwin (2000-034/CL3400) 6-pin
 - Master Ring not available

Preparation and Installation

Installation Template

For reference only. DO NOT place on door for drilling.

Tailpiece Installation

FALCON

INSTALLATION INSTRUCTIONS FOR INSTALLING T-SERIES EXTRA HEAVY DUTY LEVER LOCKSET

IMPORTANT: THIS LOCK IS NON-HANDED. LOCK IS FACTORY PACKED PREADJUSTED FOR 1 3/4" (45mm) THICK DOORS. TO ADJUST LOCK FOR OTHER DOOR THICKNESS, SEE STEP 8, 9 & 10. SPACERS MUST BE USED FOR DOORS THINNER THAN 1 3/4" (45mm) THICK. FOR FUNCTIONS T341, T351, T371, T381, T391, T561 & T571 SEE STEPS 17 (STANDARD CYLINDER) OR 18 (IC CORE) FOR TIMING INSTRUCTIONS.

STEP 1 MARK DOOR

Fold template on line indicated. Place on **HIGH EDGE** of door bevel. Position centerline of template on heightline (suggested height is 38" (965mm) from floor).

- Locate and mark center for 2 1/8" (54mm) hole.
- Locate and mark positions for notches. **Caution:** Notches must be horizontal.
- Locate and mark center for two (2) 5/16" (8mm) thru-bolt holes.
- Locate and mark center for 1" (25mm) latch bolt hole in door edge.

Note: If steel frames are used, the latch centerline must be in line with the center of the strike preparation.

Hint: For retrofitting of existing 2 1/8" (54mm) holes, fold template in half to locate position for the two (2) 5/16" (8mm) holes.

STEP 2 BORE HOLES: INSTALL LATCH

When drilling through door, be careful not to damage door finish.

- Bore a 2 1/8" (54mm) hole and two (2) 5/16" (8mm) holes from both sides of door to avoid splintering wood.
- Bore a 1" (25mm) hole into door edge. Using latch faceplate as pattern, trace outline and mortise door edge so latch is flush with door. If 3/4" projection latch is to be installed see Step 20.

Note: For wood jambs, close door and using a strike-locating tool or other pointed object mark position of hole in jamb. Open door and drill 1" (25mm) hole in jamb minimum 3/4" (19mm) deep.

- File two (2) 5/32" (4mm) x 5/32" (4mm) x 1/8" (3mm) deep notches into both sides of door.
- Insert latch unit in door, making certain that latch bolt bevel faces direction of closing door. Attach with two #8 combination screws provided.

Note: Use of a drill guide is recommended to ensure straight and level holes.

IF USING THE FALCON OPTIONAL DRILL GUIDE

Install Drill Guide (030736-000-70) into door. Make certain correct backset locators are even with door edge. Drill two (2) 5/16" (8mm) holes from both sides to center.

Note: Drill guide replacement is recommended after **10** door preparations.

Use faceplate as pattern for mortise.

STEP 3 INSTALL CHASSIS AND OUTER TRIM ASSEMBLY

Note: For ease of installation, lock should be in the **unlocked** position.

Slide chassis assembly into door from outside making sure that lock housing engages latch prongs. Retractor must also engage latch tail.

Important: Chassis assembly must be positioned in center of door for proper operation.

STEP 4 INSTALL INNER MOUNTING PLATE

- Place inner mounting plate onto chassis assembly making sure that plate tabs engage horizontal notches in door.
- Position flanged nut over chassis assembly and tighten securely with hex wrench provided.

STEP 5 INSTALL INNER TRIM ASSEMBLY

Slide inner trim assembly over chassis spindle. Thru-posts will engage inner trim assembly on 1 $\frac{3}{4}$ " (45mm) thick doors. Secure to door with two #10-32 x 1" machine screws provided.

STEP 6 INSTALL INNER LEVER

- A. Position rose over inner trim assembly making sure rose detent engages groove in spindle assembly.
- B. Install lever handle and tighten set screw with hex key provided.

Stop! Test operation to be sure latch bolt moves freely. **Do not force.** If lockset does not operate properly, remove lockset from door and check door preparation and door thickness adjustment. See Step 4 to re-install chassis.

STEP 7 LOCATE AND INSTALL STRIKE

- A. For wood jambs center strike latch opening over 1" (25mm) hole in jamb. Trace outline around the strike on door jamb.
- B. Mortise door jamb to accommodate strike box and strike.
- C. Insert strike box if required and fasten strike to jamb with combination screws provided.

Caution: Deadlocking plunger of latch bolt must not enter opening in strike plate.

Note: When strike box is not used, recess in jamb must be a minimum of $\frac{9}{16}$ " (14mm) deep to allow latch bolt to extend to its full projection.

STEP 8 INSTRUCTIONS FOR REMOVING OUTSIDE TRIM

- A. Remove the outside trim retaining screw (A).
- B. Slide the outside trim (B) from the chassis assembly.
- C. See Step 9 for chassis adjustment procedure, or Step 10 for spacer installation.
- D. Slide the outside trim (B) onto the chassis.
- E. Replace the outside trim retaining screw (A).

STEP 9 ADJUST LOCK FOR DOOR THICKNESS

Lock is factory packed preadjusted for 1¾" (45mm) doors unless ordered special.

- Place template provided against retractor housing to find marking for door thickness.
- If adjustment is necessary, use hex wrench provided and rotate flanged nut counterclockwise to adjust. Again, use template markings to measure adjustment before installing lock on door.
Hint: Three full turns of nut equals (=) ½" (3mm) adjustment.
- Pinch button mount legs together and move cap to desired position.

STEP 10 INSTALLING SPACER FOR DOORS THINNER THAN 1¾" (45mm)

- Remove flanged nut with black hex wrench provided along with outer mounting plate.
- Place on spacer over outer chassis spindle as shown.
- Re-install outer mounting plate and flanged nut. Using adjusting gage provided adjust flanged nut for proper door thickness as shown.
- See Step 4 for chassis installation.
- Place second spacer over inner chassis spindle before installing inner mounting plate and flanged nut. Continue at Step 5.

STEP 11 TO REMOVE ALL LEVERS WITH INTERCHANGEABLE CORE CYLINDERS

- Insert control key into core and rotate 15 degrees clockwise. Pull key to remove core.
- Insert screwdriver into Figure "8" core hole and into lever retainer.
- Depress retainer and slide lever off spindle.

TO RE-INSTALL LEVER

- Slide lever over spindle and push on over retainer.
- Pull on lever to be sure retainer engaged lever.
- Re-install core with tailpiece pushed into core.

STEP 12 IC CORE AND TAILPIECE

Be certain to use correct tailpiece with core. Six pin cores should only use the "6P" tailpiece. Seven pin cores should only use the "7P" tailpiece.

STEP 13 TO REMOVE ALL CYLINDER LEVERS
(Except Interchangeable Core)

- A. Insert key and rotate clockwise approximately 60 degrees.
- B. Depress lever retainer with tool provided.
- C. Slide lever off spindle.

TO RE-INSTALL LEVER

- D. Insert cylinder into spindle.
- E. Slide lever onto spindle.
- F. Insert key into cylinder and rotate clockwise approximately 60 degrees and push lever over retainer.
- G. Pull on lever to be sure retainer engaged lever.

STEP 14 TAILPIECE INSTALLATION

For proper function of the lock the tailpiece must be installed correctly. All T-Series tailpieces should be installed **VERTICALLY** in the cylinder.

STEP 15 DOUBLE DUMMY TRIM, T18

- A. Using template described in Step 1, locate and mark center for two (2) 5/16" (8mm) Thru-Bolt Holes.
- B. Bore two (2) 5/16" (8 mm) holes from both sides of door to avoid splintering wood.
- C. Holding outer trim against door, position inner spindle assembly over thru-posts and secure to door with two #10-32 x 1" machine screws provided.
- D. See Step 6 for lever installation.

STEP 16 SINGLE DUMMY TRIM, T12

- A. Using template described in Step 1, locate and mark center for two (2) mounting holes.
- B. **For Wood Door** - Drill two (2) pilot holes 5/32" (4mm) x 7/8" (22mm) deep for #12 wood screws.
- For Metal Door** - Drill and tap two (2) holes for #12-24 machine screws.
- C. Position spindle assembly over mounting holes and secure to door with screws provided.
- D. See Step 6 for lever installation.

STEP 17 TIMING INSTRUCTIONS FOR STANDARD CYLINDER LOCKS
 FOR THE FOLLOWING FUNCTIONS: T341, T351, T371, T381, T391, T561, T571

- A. If the cylinder and handle are installed, refer to step 13 for lever removal instructions.
- B. Using a thin flat screw driver, turn the action bar slot clockwise (cw) until it stops at about 2:00. 
- C. Then turn the action bar counterclockwise (ccw) to the 9:00 position. **NOTE:** No physical stop is at this location. 
- D. With the key out, install standard cylinder into the spindle.
- E. Refer to step 13 for lever installation instructions.
- F. Operate key to test for proper operation.

STEP 18 TIMING INSTRUCTIONS FOR IC CORE LOCKS
 FOR THE FOLLOWING FUNCTIONS: T341, T351, T371, T381, T391, T561, T571

- A. If the core is installed, refer to step 11 for IC core removal instructions.
- B. Using a thin flat screw driver, turn the action bar slot clockwise (cw) until it stops at about 11:00. 
- C. Then turn the action bar counterclockwise (ccw) to the 7:00 position. **NOTE:** There is NO physical stop is at this location. 
- D. Using the control key, insert IC core into the lever and spindle.
- E. Remove control key.
- F. Operate key to test for proper operation.

STEP 19 TAILPIECE INSTALLATION INSTRUCTIONS FOR T381 FUNCTION

SEE STEP 14 FOR
 STANDARD CYLINDER
 TAILPIECE
 INSTALLATION

SEE STEP 12 FOR
 IC CORE TAILPIECE
 INSTALLATION

STEP 20 INSTALLATION INSTRUCTIONS FOR OPTIONAL 3/4" PROJECTION LATCH

- A. Determine the hand of the door.
- B. On the side closest to the door stop, remove shaded area as shown. Use a standard rotary file 3/8" diameter maximum.
- C. Try latch for fit and function.
- D. Secure latch with two (2) #8-32 machine screws provided.

WARRANTY

FALCON

WARRANTY

Falcon Door Hardware warrants its mechanical offering of locks, exit devices and door controls products manufactured to be free from defects in materials and workmanship for a period of **TEN (10) YEARS** from the date of manufacture with the exception of the products detailed in the table below. The terms and conditions of this new warranty apply to Falcon Door Hardware shipments made on or after November 1st, 2008.

This limited warranty does not cover products that (i) are not the proper size for the application; (ii) are not installed in accordance with Falcon's published installation instructions; (iii) are installed with improper or incorrect parts; (iv) have been, in the opinion of Falcon, modified, repaired, or altered in any way without the express written consent of Falcon; (v) are used for purposes which they are not designed or intended; (vi) are subjected to misuse, abuse, negligence, or accident; or (vii) are grade 2 products used in educational facilities. The following costs and expenses are not covered by the provisions of this limited warranty; (i) labor costs for the removal and reinstallation of products; (ii) shipping and freight expenses required to return products to Falcon; (iii) normal maintenance; and (iv) economic losses. **THE PREVISIONS OF THIS WARRANTY DO NOT APPLY TO FINISHES.**

Falcon will replace the products which, in the opinion of Falcon, are found to be defective, provided said products are returned to Falcon.

FALCON SHALL IN NO EVENT BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES FOR ANY CLAIM WHETHER BASED ON CONTRACT; WARRANTY, TORT (INCLUDING, BUT NOT LIMITED TO, STRICT LIABILITY OR NEGLIGENCE), PATENT INFRINGEMENT, OR OTHERWISE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

This limited warranty is in place of all other warranties, expressed or implied, and excludes any warranties of fitness for a particular purpose or merchantability. No agent, representative, dealer, or employee of Falcon has the authority to increase or alter the obligations of this limited warranty.

Note: Should the Product be considered a "consumer product" as may be covered by the Magnuson-Moss Federal Warranty Act, please be advised that: (1) Some states do not allow limitations on incidental or consequential damages or how long an implied warranty lasts, so that the above limitations may not fully apply; and (2) This warranty gives specific legal rights and a user may have rights which may vary from state to state.
