Alternate Installations

Oven can also be installed into an existing two-cavity oven cutout opening measuring 42½" H x 22½" W. To accommodate opening for smaller oven, filler strips need to be installed vertically on each side of opening along with two standard 2 x 4s (22" minimum length), installed upright on each side beneath oven's side rails, flush with cabinet front. Two height adjusters, located on bottom sides of oven wrapper, must also be lowered to raise oven by 1". Oven's bottom trim will then overlap cabinet face ½" min. to hide opening at bottom.

To accommodate existing 37 $^{1}/_{2}$ " to 39" cutout height, oven's height adjusters can be lowered to raise oven by 1" in addition to bottom trim's $^{1}/_{2}$ " overhang allowing for a 1 $^{1}/_{2}$ " total height adjustment.

Single Wall Oven Specifications

- Product Shipping Weight (approx.) 200 Lbs.
- Voltage Rating 120V/60 Hz/15 Amps
- Connected Load (kW Rating) @ 120 Volts = .60 kW (For use on adequately wired 120V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.)
- Amps @ 120V = 5 Amps
- · Always consult local and national electric and gas codes.
- Oven ships with 3/4" factory regulator.
- LP Gas convertible.
- Do not obstruct flow of combustion air at oven vent nor around base or beneath lower front panel of appliance. Oven requires fresh air for proper burner combustion.
- Minimum 19-3/8" clearance for oven door depth when open.
- Full oven base of solid plywood or similar material required, capable of supporting 150 Lbs.
- · Base must be level and cabinet front must be square.
- Single Wall Oven is NOT approved to be used in side-by-side installation.
- Single Wall Oven is NOT approved to be used alone in under-counter installation or in combination with any Frigidaire® Warmer Drawer or Built-In Microwave Oven.

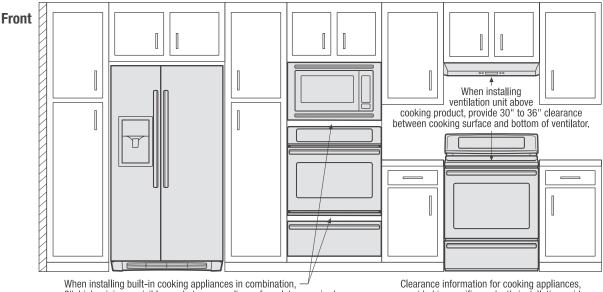

Alternate Installations

- Oven can also be installed into an existing two-cavity oven cutout opening measuring 42-1/8" H x 22-1/2" W. To accommodate opening for smaller oven, filler strips need to be installed vertically on each side of opening along with two standard 2 x 4s (22" minimum length), installed upright on each side beneath oven's side rails, flush with cabinet front. Two height adjusters, located on bottom sides of oven wrapper, must also be lowered to raise oven by 1". Oven's bottom trim will then overlap cabinet face 1/4" minimum to hide opening at bottom.
- To accommodate existing 37-1/2" to 39" cutout height, oven's height adjusters must be lowered to raise oven by 1" in addition to bottom trim's 1/2" overhang allowing for a 1-1/2" total height adjustment.

*When installing side-by-side refrigerator adjacent to wall, cabinet or another appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 120° to 180° door swing. providing complete drawer/crisper access and removal. (Absolute 4-1/2" minimum clearance will ONLY allow for 90° door swing which will provide limited drawer/crisper access with restricted removal.)

When installing appliance with sliding drawer, swinging or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swings.
