

FULGOR

MILANO

SINGLE BUILT IN ELECTRIC OVENS: LEONARDO CLASSICO (700 SERIES) + 500 SERIES

FULGOR MILANO

► FULGOR MILANO HIGHLIGHTS

- ▲ **AWARD WINNING DESIGN** makes the Leonardo Classico Series of built in ovens the ultimate in good taste. Having earned Design Journal's 2007 PLATINUM ADEX award for design excellence—recognizing its unique, stunning, three-dimensional design and supreme beauty—this series is a presence in any kitchen.
- ▲ **TRUE EUROPEAN DUAL CONVECTION OVEN** by Fulgor provides the industry's best dual convection system for more exacting cooking performance. These ovens come standard with dual 1,300 Watt true European convection heating elements, for a total of 2,600 Watts that, unlike other systems, can be used simultaneously throughout all convection cooking functions. Fulgor is one of very few manufacturers offering dual convection in North America, leveraging our 60 years of experience as true cooking professionals who understand the technology.
- ▲ **ELEVEN PRESET COOKING FUNCTIONS** on all convection models for more customized cooking to help you cook your meals with speed and precision. Presets include Convection Bake, Convection Broil, Convection Roast, Pizza, Bake, Broil, Dehydrate, Proof, Defrost, Warming, and Clean.
- ▲ **VARIABLE SELF-CLEAN MODE** is the fastest and most versatile self clean mode available. Our variable self clean mode lets users decide how long to run the self cleaning cycle—anywhere from two to four hours—depending on the level of cleaning the oven needs. The first to introduce residential self cleaning European convection ovens into the USA in 1994, Fulgor includes a self cleaning feature on every oven we produce.
- ▲ **COOL-TOUCH DOORS** set Fulgor ovens apart with an innovative fourth pane of door glass. By adding an additional pane of specially tempered glass, the exterior temperature of Fulgor's oven door is reduced by as much as 40°F during the high-heat self-clean cycle. Another innovative safety method to protect users and their families. Fulgor has one of the coolest surface temperatures in the industry.

► STANDARD FEATURES

- > Steady Hinges
 - > Super Fast Preheat
 - > Delayed Start Time
 - > Concealed 8 Pass Bake Element
 - > Side Wall Halogen Lighting
 - > Child Safety Lockout
 - > Oversized Oven Capacity
 - > Telescopic Rack in Convection Cavity
 - > Porcelain Enameled Racks
 - > Extra-Wide 10 Pass Broiler Element
 - > Sabbath Mode Function
 - > Six Rack Positions
 - > Included Meat Probe
 - > Included Grill Set
- ▲ **2 YEARS WARRANTY** for all Fulgor Milano appliances. We offer the industry's best-in-class Warranty for all our appliances. Two years parts and labor.

➤ FULGOR MILANO HIGHLIGHTS

- ▲ **TRUE EUROPEAN CONVECTION OVEN** by Fulgor combines a powerful 2,500 Watt heating element together with a circulating cavity fan to consistently distribute heated air for even cooking without cold spots.
- ▲ **VARIABLE SELF-CLEAN MODE** is the fastest and most versatile self clean mode available. Our variable self clean mode lets users decide how long to run the self cleaning cycle—anywhere from two to four hours—depending on the level of cleaning the oven needs. The first to introduce residential self cleaning European convection ovens into the USA in 1994, Fulgor includes a self cleaning feature on every oven we produce.
- ▲ **COOL-TOUCH DOORS** set Fulgor ovens apart with an innovative fourth pane of door glass. By adding an additional pane of specially tempered glass, the exterior temperature of Fulgor's oven door is reduced by as much as 20°F during the high-heat self clean cycle. Another innovative safety method to protect users and their families. Fulgor has one of the coolest surface temperatures in the industry.
- ▲ **ENERGY EFFICIENT PERFORMANCE** made from 90% recyclable material, Fulgor ovens exceed all European efficiency standards which are higher than those in the USA & Canada. Also, our ovens comply with an European agency called RoHS ensuring that no hazardous materials are used in our ovens.
- ▲ **ECONOMICAL CAVITY DIMENSIONS** built with space-conscious consumers in mind, this oven fits into virtually any kitchen space—yet still cooks a 30 lb turkey with exacting precision. Plus smaller cavity dimensions reduce the energy consumption leading to lower energy bills.

SINGLE BUILT IN ELECTRIC OVENS: "EURO STYLE" 100 SERIES - 30" x 24"

FULGOR MILANO

➤ FULGOR MILANO HIGHLIGHTS

- ▲ TRUE EUROPEAN CONVECTION OVEN by Fulgor combines a powerful 2,500 Watt heating element together with a circulating cavity fan to consistently distribute heated air for even cooking without cold spots.
- ▲ VARIABLE SELF-CLEAN MODE is the fastest and most versatile self clean mode available. Our variable self clean mode lets users decide how long to run the self cleaning cycle—anywhere from two to four hours—depending on the level of cleaning the oven needs. The first to introduce residential self cleaning European convection ovens into the USA in 1994, Fulgor includes a self cleaning feature on every oven we produce.
- ▲ COOL-TOUCH DOORS set Fulgor ovens apart with an innovative fourth pane of door glass. By adding an additional pane of specially tempered glass, the exterior temperature of Fulgor's oven door is reduced by as much as 20°F during the high-heat self clean cycle. Another innovative safety method to protect users and their families. Fulgor has one of the coolest surface temperatures in the industry.
- ▲ ENERGY EFFICIENT PERFORMANCE made from 90% recyclable material, Fulgor ovens exceed all European efficiency standards which are higher than those in the USA & Canada. Also, our ovens comply with an European agency called RoHS ensuring that no hazardous materials are used in our ovens.
- ▲ ECONOMICAL CAVITY DIMENSIONS built with space-conscious consumers in mind, this oven fits into virtually any kitchen space—yet still cooks a 30 lb turkey with exacting precision. Plus smaller cavity dimensions reduce the energy consumption leading to lower energy bills.

DOUBLE BUILT IN ELECTRIC OVENS: LEONARDO CLASSICO (700 SERIES) + 500 SERIES

FULGOR MILANO

► FULGOR MILANO HIGHLIGHTS

- ▲ **AWARD WINNING DESIGN** makes the Leonardo Classico Series of built in ovens the ultimate in good taste. Having earned Design Journal's 2007 PLATINUM ADEX award for design excellence—recognizing its unique, stunning, three-dimensional design and supreme beauty—this series is a presence in any kitchen.
- ▲ **TRUE EUROPEAN DUAL CONVECTION OVEN** by Fulgor provides the industry's best dual convection system for more exacting cooking performance. These ovens come standard with dual 1,300 Watt true European convection heating elements, for a total of 2,600 Watts that, unlike other systems, can be used simultaneously throughout all convection cooking functions. Fulgor is one of very few manufacturers offering dual convection in North America, leveraging our 60 years of experience as true cooking professionals who understand the technology.
- ▲ **ELEVEN PRESET COOKING FUNCTIONS** on all convection models for more customized cooking to help you cook your meals with speed and precision. Presets include Convection Bake, Convection Broil, Convection Roast, Pizza, Bake, Broil, Dehydrate, Proof, Defrost, Warming, and Clean.
- ▲ **VARIABLE SELF-CLEAN MODE** is the fastest and most versatile self clean mode available. Our variable self clean mode lets users decide how long to run the self cleaning cycle—anywhere from two to four hours—depending on the level of cleaning the oven needs. The first to introduce residential self cleaning European convection ovens into the USA in 1994, Fulgor includes a self cleaning feature on every oven we produce.
- ▲ **COOL-TOUCH DOORS** set Fulgor ovens apart with an innovative fourth pane of door glass. By adding an additional pane of specially tempered glass, the exterior temperature of Fulgor's oven door is reduced by as much as 40°F during the high-heat self-clean cycle. Another innovative safety method to protect users and their families. Fulgor has one of the coolest surface temperatures in the industry.

► STANDARD FEATURES

- > Steady Hinges
 - > Super Fast Preheat
 - > Delayed Start Time
 - > Concealed 8 Pass Bake Element
 - > Side Wall Halogen Lighting
 - > Child Safety Lockout
 - > Oversized Oven Capacity
 - > Telescopic Rack in Convection Cavity
 - > Porcelain Enameled Racks
 - > Extra-Wide 10 Pass Broiler Element
 - > Sabbath Mode Function
 - > Six Rack Positions
 - > Included Meat Probe
 - > Included Grill Set
- ▲ **2 YEARS WARRANTY** for all Fulgor Milano appliances. We offer the industry's best-in-class Warranty for all our appliances. Two years parts and labor.

➤ **FULGOR MILANO HIGHLIGHTS**

- ▲ **TRUE EUROPEAN CONVECTION OVEN** by Fulgor combines a powerful 2,500 Watt heating element together with a circulating cavity fan to consistently distribute heated air for even cooking without cold spots.
- ▲ **VARIABLE SELF-CLEAN MODE** is the fastest and most versatile self clean mode available. Our variable self clean mode lets users decide how long to run the self cleaning cycle—anywhere from two to four hours—depending on the level of cleaning the oven needs. The first to introduce residential self cleaning European convection ovens into the USA in 1994, Fulgor includes a self cleaning feature on every oven we produce.
- ▲ **COOL-TOUCH DOORS** set Fulgor ovens apart with an innovative fourth pane of door glass. By adding an additional pane of specially tempered glass, the exterior temperature of Fulgor's oven door is reduced by as much as 20°F during the high-heat self clean cycle. Another innovative safety method to protect users and their families. Fulgor has one of the coolest surface temperatures in the industry.
- ▲ **ENERGY EFFICIENT PERFORMANCE** made from 90% recyclable material, Fulgor ovens exceed all European efficiency standards which are higher than those in the USA & Canada. Also, our ovens comply with an European agency called RoHS ensuring that no hazardous materials are used in our ovens.
- ▲ **ECONOMICAL CAVITY DIMENSIONS** built with space-conscious consumers in mind, this oven fits into virtually any kitchen space—yet still cooks a 30 lb turkey with exacting precision. Plus smaller cavity dimensions reduce the energy consumption leading to lower energy bills.

➤ **FULGOR MILANO HIGHLIGHTS**

- ▲ Induction is a new, evolving category in cook-tops. There is an increased demand from the final consumer. It is an opportunity to cook in an environmentally friendly way. Induction heating and cooking is the most efficient way available for cooking. The heat is produced with an electromagnetic field created directly on the bottom of the pot or pan being used.
- ▲ The surface remains cold and heats only when it is in direct contact with the cooking container. When you are finished cooking, the surface is cold to the touch.
- ▲ This is the most efficient cooking device due to the fact that it does not waste energy for the dispersion of heat as gas burners do. They are 30-50% faster than normal levels with HGL technology allowing a 25% energy savings.
- ▲ If there is overflow from the cooking container, it does not stick to the surface of the induction cook top because it is cold.
- ▲ Elegant and technologically advanced, make this Fulgor Milano product a great proposition for the market and a wonderful addition to the vast Fulgor Milan built-in line.
- ▲ This product is in the process of certification and will be confirmed in the next few weeks. We will notify you for the launch date to market.

➤ **STANDARD FEATURES**

- > Low Profile Housing
 - > Residual Heat Indicators
 - > Child Lock
 - > Schott Ceran® Ceramic Glass
 - > Stainless Steel Frame Available
 - > Peacock Touch Control
- ▲ **2 YEARS WARRANTY** for all Fulgor Milano appliances. We offer the industry's best-in-class Warranty for all our appliances. Two years parts and labor.

➤ **FULGOR MILANO HIGHLIGHTS**

- ▲ **FULGOR'S STUNNING ITALIAN DESIGN** control panel was expertly designed with ultimate usability in mind. With more surface area for burners, having multiple large pots cooking at once is no longer a problem!
- ▲ **THE RADIANT HEATING ELEMENTS** provide quick, reliable and evenly distributed heat for more consistent cooking. Ribbon style heating elements are quick to glow and reach maximum temperatures. Special insulation around the heating element controls heat spread for better energy efficiency and consistency.

➤ **FULGOR MILANO HIGHLIGHTS**

- ▲ **ITALIAN DESIGN** allows for greater surface space and the flexibility to position large pots and pans vertically or horizontally on the cooktop. An aesthetic unique to Fulgor this design is one-of-a-kind.
- ▲ **DUAL CROWN BURNER (IN ALL MODELS)** is based on patented technology. Fulgor uses a dual-flame European style sealed burner to deliver one of the widest ranges of burner output available. Burners power start from 3,500 to 15,000 BTU/H.
- ▲ **EUROPEAN SEALED BURNERS** are designed with only two removable parts (Cap & Flame Spreader), keeping spills from entering the internal workings of the cooktop. Not only does this make the unit simpler to clean, but also more accessible for service. Also, the unit draws oxygen from above the cooktop rather than below, improving the safety of the unit.
- ▲ **ENVIRONMENTALLY FRIENDLY** Complies with RoHS standards. Meets European and Canadian standards – higher than those in the US. Made with over 90% recyclable components.
- ▲ **TOP MOUNT INJECTORS** allow easy removal and replacement of fuel injectors and gas flame regulation from above without ejecting the housing from the counter or crawling under the cabinet to access.

➤ **STANDARD FEATURES**

- > Electric Flame Ignition & Re-Ignition
 - > Flame-out sensor
 - > Simmer Plate
 - > Small Pot Insert
 - > Wok Ring
 - > Heavy-Duty Cast Iron Grates
-
- ▲ **2 YEARS WARRANTY** for all Fulgor Milano appliances. We offer the industry's best-in-class Warranty for all our appliances. Two years parts and labor.

➤ **FULGOR MILANO HIGHLIGHTS**

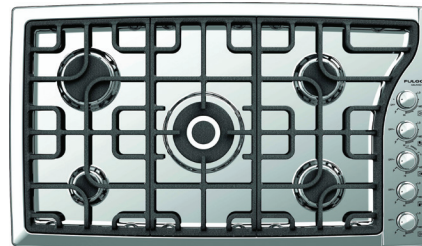

- ▲ **ITALIAN WING DESIGN** allows for greater surface space and the flexibility to position large pots and pans diagonally on the cooktop. An aesthetic unique to Fulgor this design is one-of-a-kind.
- ▲ **DUAL CROWN BURNER (36" MODELS ONLY)** is based on patented technology. Fulgor uses a dual-flame European style sealed burner to deliver one of the widest ranges of burner output available. From 18,000 BTU/H for searing meat and locking in flavor, down to 450 BTU/H for soft simmering and melting butter or chocolate. Available on all 36" models.
- ▲ **EUROPEAN SEALED BURNERS** are designed with only two removable parts (Cap & Flame Spreader), keeping spills from entering the internal workings of the cooktop. Not only does this make the unit simpler to clean, but also more accessible for service. Also, the unit draws oxygen from above the cooktop rather than below, improving the safety of the unit.
- ▲ **ENVIRONMENTALLY FRIENDLY** Complies with RoHS standards. Meets European and Canadian standards – higher than those in the US. Made with over 90% recyclable components.
- ▲ **TOP MOUNT INJECTORS** allow easy removal and replacement of fuel injectors and gas flame regulation from above without removing the housing from the counter or crawling under the cabinet to access.
