

JB630RF

GE® 30" Free-Standing Electric Range

Dimensions and Installation Information (in inches)

Receptacle Locations

Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Note: 30" ranges conform to U.L. requirements for 0" spacing from adjacent walls below countertops. To reduce possibility of scorching walls, engineering recommends a minimum of 1-1/2" spacing to allow for possible extended, high-heat, no-load heating element operation.

Installation Information: Before installing, consult installation instructions for current dimensional data and additional requirements.

KW Rating	
240V	11.3
208V	8.5
Breaker Size	
40 Amps†	

†**Note:** Check local codes for required breaker size.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.
