- Please read over these instructions thoroughly before beginning installation. Make sure that you have all tools and supplies needed to complete the installation.
- Do not remove the plastic installation box from the valve.
- The cartridge is included with the trim kit. The cartridge will vary, according to the type of trim kit.
- The cartridge has an integrated high temperature limit stop which may be reset to comply with local plumbing codes.

- To prevent scald injury, the maximum output temperature of the shower valve must be no higher than 120°F. In Massachusetts the maximum output temperature of the shower valve can be no higher than 112°F.

Know in advance what type of trim kit is to be used. Installation requirements vary. Additional valve(s) may be required.

For correct function of the valve, the hot supply must be plumbed to the hot inlet (left horizontal side) and the cold supply must be plumbed to the cold inlet (right horizontal side).

- Protect the rough from freeze damage. In the event of freezing temperatures, drain the pipes.

À prendre en considération pour l'installation

- Pour de meilleurs résultats, Hansgrohe recommande que ce produit soit installé par un plombier professionnel licencié.

- La cartouche dispose d'une butée de limite d'eau chaude qui peut être réglée de façon à satisfaire aux codes de plomberie locaux.
- Pour empêcher des blessures par ébouillantement, la température de sortie maximale du robinet de douche ne doit pas excéder 120°F. Au Massachusetts, la température de

sortie maximale du robinet de douche ne doit pas excéder 112°F.

Déterminez à l'avance le type de jeu de garniture à utiliser. Les exigences d'installation varient. Il pourra être nécessaire d'utiliser des robinets supplémentaires.

Pour que le robinet fonctionne correctement, la conduite d'alimentation de l'eau chaude doit être installée dans l'orifice d'arrivée prévu pour l'eau chaude (l'horizontale latérale gauche), et la conduite d'eau froide doit être installée dans l'orifice d'arrivée prévu pour l'eau froide (l'horizontale latérale droite).

- Protégez la pièce intérieure des dommages occasionnés par le gel. Vidangez les tuyaux si les températures sont au-dessous du point de congélation.

Cleaning Recommendation for Hansgrohe Products

Modern lavatory faucets, kitchen faucets, and showers consist of very different materials to comply with the needs of the market with regard to design and functionality. To avoid damage and returns, it is necessary to consider certain criteria when cleaning.

Cleaning Materials for Faucets and Showers

Acids are a necessary ingredient of cleaning materials for removing lime, however please pay attention to the following points when cleaning faucets and showers:

- Only use cleaning materials which are explicitly intended for this type of application.
- Never use cleaning materials which contain hydrochloric, formic, phosphoric, or acetic acid, as they cause considerable damage.
- Never mix one cleaning material with another.
- Never use cleaning materials or appliances with an abrasive effect, such as unsuitable cleaning powders, sponge pads, or micro fiber cloths.

Cleaning Instructions for Faucets and Showers

Please follow the cleaning material manufacturer's instructions. In addition, pay attention to the following points:

- Clean the faucets and showers as and when required
- Use the amount of cleaning product and the amount of time recommended by the manufacturer. Do not leave the cleaner on the fixture longer than necessary.
- Regular cleaning can prevent calcification.
- When using spray cleaners, spray first onto a soft cloth or sponge. Never spray directly onto the faucet as droplets can enter openings and gaps and cause damage.
- After cleaning, rinse thoroughly with clean water to remove any cleaner residue.

Important

Residues of liquid soaps, shampoos, and shower foams can also cause damage, so rinse with clean water after using.

Please note: if the surface is already damaged, the effect of cleaning materials will cause further damage.

Components with damaged surfaces must be replaced or injury could result.

Damage caused by improper treatment is not covered under the warranty.

Indicaciones para el montaje

- El grifo tiene que ser instalado, probado y testado, según las normas en vigor.
- En el momento del montaje del producto por parte de personal especializado y cualificado se deberá prestar una atención especial a que la superficie de fijación en toda el área de la fijación sea plana (sin juntas que sobresalen ni azulejos desplazados), que la estructura de la pared sea adecuada para un montaje del producto y que, ante todo, no presente puntos débiles. Los tornillos y tacos adjuntos son sólo apropiados para hormigón. En el caso de otras estructuras murales se deberán considerar las indicaciones del fabricante de tacos.
- La junta de filtración que se suministra con la ducha mural evita que las partículas de suciedad procedentes de las tuberías lleguen a la ducha mural. Debe colocarse entre el flexo y la ducha mural. Infiltraciones de suciedad deterioran el funcionamiento de la ducha mural y pueden causar daños en el interior de la misma que no están cubiertas por la garantía de Hansgrohe.

⚠ Turvallisuusohjeet

- ⚠ Asennuksessa on käytettävä käsineitä puristumiien ja vilttojen aiheuttamien tapaturmien estämiseksi.
- ⚠ Lapset ja ruumillisesti, henkisesti ja/tai aistillisesti rajoittuneet aikuiset eivät saa käyttää suihkujärjestelmää ilman valvontaa. Alkoholin tai huumeiden vaikutuksessa olevat henkilöt eivät saa käyttää suihkujärjestelmää.
- ⚠ Suihkuveden kontaktia herkkien ruumiinosien (esim. silmien) kanssa on vältettävä. Suihku ja vartalon välissä on oltava riittävä väli.
- ⚠ Tuotetta ei saa käyttää kädensijana. On asennettava erillinen kädensija.
- ⚠ Suihkujärjestelmää saa käyttää ainostaan kylpy-, hygienia- ja puhdistustarkoituksiin.
- ⚠ Suihkuletkut soveltuват vain käsisuihkuun liittämiseen armatuureihin. Letkun jälkeen virtaussuunnassa oleva sulkuventtiili ei ole salittu!

Asennusohjeet

- Kaluste on asennettava, huuhdeltava ja tarkastettava voimassa olevien määräysten mukaisesti.
- Kun pätevä ammattihenkilöstö suorittaa tuotteen asennusta, on huomioitava, että kiinnityspinta on koko kiinnityksen alueella tasainen (ei ulkonevia saumoja tai laattojen tasomuutoksia) ja, että seinän rakenne soveltuu tuotteen asentamiseen eikä siinä ole heikkoja kohtia. Mukana olevat kiinnitysruuvit ja kiinnitysankurit soveltuvat betoniin kiinnittämiseen. Kiinnitettäessä tuotetta muihin seinärakenteisiin, noutata kiinnittimen valmistajan ohjeita.
- Käsisuihku mukana toimitettu sihtitiiviste on asennettava paikalleen, jotta lian huuhtoutuminen vesijohtoverkostosta käsisuihkuun estyy. Huuhdoutuvat likahiukkaset voivat häirittää suihku toimintaa tai vahingoittaa toimintaosia, Hansgrohe ei vastaa tästä aiheutuneista vahingoista.

Saugumo technikos nurodymai

- ⚠ Apsaugai nuo užspaudimo ir įsipjovimo montavimo metu mūvėkite pirštines.
- ⚠ Dušo sistema uždrausta naudotis vaikams, taip pat suaugusiems su fizine, dvasine negale ir (arba) sensorikos sutrikimais. Dušo sistema taip pat uždrausta naudoti asmenims, apsaugusiems nuo alkoholio arba narkotikų.
- ⚠ Būtina vengti dušo vandens srovės kontakto su jautriomis kūno vietomis (pvz., akimis). Todėl būtina laikytis tinkamu atstumu nuo dušo.
- ⚠ Gaminys neturi būti naudojamas kaip rankena. Rankena montuojama atskirai.
- ⚠ Dušo sistema turi būti naudojama tik kūno higienai ir švarai palaikyti.
- ⚠ Dušo žarnos yra pritaikytos tik prijungti dušo galvutę prie vandens maišytuvo. Negalima montuoti vandens uždarymo mechanizmo tarp maišytuvo ir žarnos.

Montavimo instrukcija

- Maišytuvą privalo būti montuojamas ir išbandomas pagal veikiančias normas ir šią instrukciją.
- Montuojant produktą, specialistas privalo įsitikinti, kad sienos plotas, prie kurio dedama montavimo plokštė, yra lygus (jokių plytelių ar kitų nelygumų), kad sienos struktūra yra pritaikyta produkto montavimui ir neturi jokių silpnų vietų. Pakuotėje esantys varžtai ir kaiščiai yra skirti tik betonui. Esant kitokiai sienai, varžtus ir kaiščius reikia rinktis pagal paskirtį.
- Tinklelis, kuris yra rankų dušass pakuočėje, privalo būti įstatytas, kad būtų apsaugota nuo išorės nešvarumų. Nešvarumai gali pakenkti rankų dušass funkcionalumui ir (arba) sugadinti rankų dušass funkcinės dalis. Tokiu atveju „Hansgrohe“ atsakomybės neprisiima.

- ⚠ Produktet skal ikke brukes som holdegrøp. Det skal monteres en separat holdegrøp.
- ⚠ Dusjsystemet skal kun brukes for bade-, hygiene- og kroppsrensgjøringsformål.
- ⚠ Dusj slanger er kun egnet for tilkobling av dusj til armaturer. Det er ikke tillatt med en avsperring etter slangen i gjennomstrømningsretning!

Montagehenvisninger

- Armaturen skal monteres, spyles og sjekkes iht. gyldige standarder.
- Når kvalifisert fagfolk monterer produktet, skal man påse at hele området der produktet monteres er plant (ingen fremstående fuger eller flisekanter), at oppbygging av veggen er egnet for montasje av produktet og at veggen ikke viser noen svakpunkter. Medleverte skruer og plugger egner seg kun for betong. Ved en annen veggoppbygging skal man ta hensyn til pluggprodusentens henvisninger.
- Silpakningen som er levert med dusjen skal bygges inn for å forhindre at smuss spyles inn fra ledningsnettet. Innspilt smuss kan påvirke funksjonen negativt og/eller kan medføre skader på hånddusjens funksjonsdeler. Hansgrohe påtar seg inget ansvar for skader som resulteres av dette.

Cleaning Recommendation for Hansgrohe Products

Modern lavatory faucets, kitchen faucets, and showers consist of very different materials to comply with the needs of the market with regard to design and functionality. To avoid damage and returns, it is necessary to consider certain criteria when cleaning.

Cleaning Materials for Faucets and Showers

Acids are a necessary ingredient of cleaning materials for removing lime, however please pay attention to the following points when cleaning faucets and showers:

- Only use cleaning materials which are explicitly intended for this type of application.
- Never use cleaning materials which contain hydrochloric, formic, phosphoric, or acetic acid, as they cause considerable damage.
- Never mix one cleaning material with another.
- Never use cleaning materials or appliances with an abrasive effect, such as unsuitable cleaning powders, sponge pads, or micro fiber cloths.

Cleaning Instructions for Faucets and Showers

Please follow the cleaning material manufacturer's instructions. In addition, pay attention to the following points:

- Clean the faucets and showers as and when required
- Use the amount of cleaning product and the amount of time recommended by the manufacturer. Do not leave the cleaner on the fixture longer than necessary.
- Regular cleaning can prevent calcification.
- When using spray cleaners, spray first onto a soft cloth or sponge. Never spray directly onto the faucet as droplets can enter openings and gaps and cause damage.
- After cleaning, rinse thoroughly with clean water to remove any cleaner residue.

Important

Residues of liquid soaps, shampoos, and shower foams can also cause damage, so rinse with clean water after using.

Please note: if the surface is already damaged, the effect of cleaning materials will cause further damage.

**Components with damaged surfaces must be replaced or injury could result.
Damage caused by improper treatment is not covered under the warranty.**
