

House of Troy

Scatchard Stoneware™

2018

A craftsman wearing a green t-shirt and a dark baseball cap is working on a lathe in a workshop. The scene is dimly lit, with a warm, glowing lamp hanging from the ceiling. The craftsman is focused on his work, with his hands positioned on the lathe's controls. The background shows various tools and equipment, creating a sense of a busy, traditional workshop.

House of Troy

Tucked into the northern Vermont hills, just down the road from the picturesque ski village of Stowe, House of Troy has been producing classic lighting since the mid 1940's. Though off the beaten path and far from the spotlights of the big cities, our reputation burns brightly. For nearly seventy years, House of Troy has offered lighting known for its craftsmanship and quality.

We began as metal workers, making products to illuminate fine art work. Over the years we expanded our line to include floor lamps, table lamps and wall lamps. We design our products around a light source creating fine task lamps which suit a need.

In 2013 we purchased Scatchard Stoneware and opened our pottery in Hyde Park Vermont. Using a high fire reduction process and proprietary glazes, we now offer decorative lamps with beautiful deep finishes that will stand the test of time.

Picture Lights – Plug-In

Plug-In picture lights work best when you have easy access to an outlet. They come with an 8' ivory cord equipped with a high-low roll switch conveniently located 3' from the plug end. If you are planning construction, have your contractor install recessed outlets behind the art work and remotely switch on the wall with a dimmer system.

Picture Lights – Direct Wire

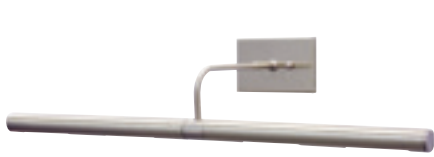

Krista Watterworth Design Studio/Jessica Glynn Photography

Direct wire picture lights are the preferred installation for the contract industry. Mount your light on a junction box installed over art work so that the picture light sits a few inches from the top of the art. Use a dimmer switch to regulate the light.

Picture Lights – Battery Operated

Sarah Gibson, Designer & Blogger, Room for Tuesday

Battery operated picture lights are a great solution when it is impossible to get power to your picture light. Our battery-operated picture lights are LED, which use less power and give adequate illumination to light your art work for as long as 48 hours.

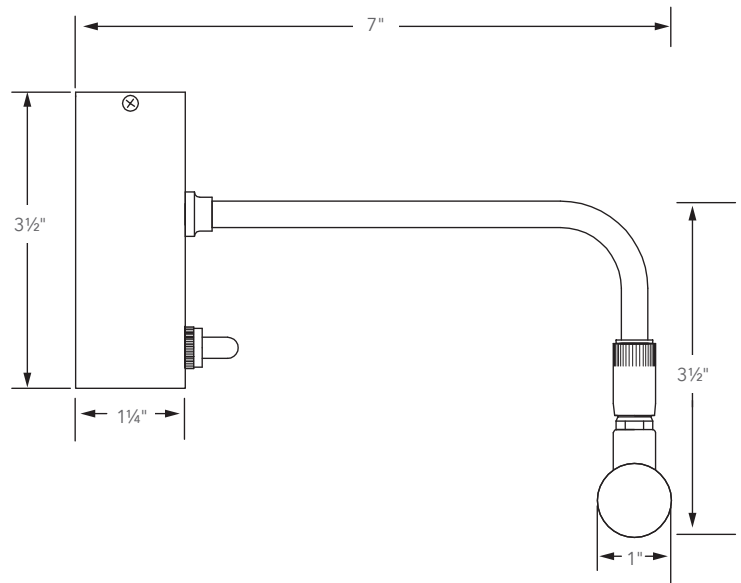

Battery Operated Slim-Line™ LED

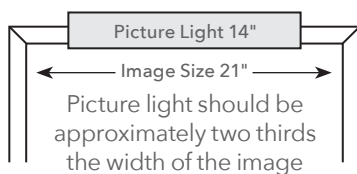

BSLED24-91 (Oil Rubbed Bronze)

Features

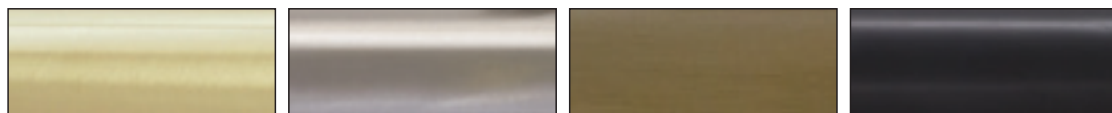

- Operates on four c-cell batteries (not included)
- Battery Life 36-48 hours
- No damaging UV
- 50,000 hour lifetime
- Swivel at shade to adjust light
- Polished metal reflector in shade for maximum light output

Custom Direct Mount Lighting

Customizing House of Troy Picture Lights.

We are often asked for custom versions of existing products, especially picture lights. Picture Lights are easily adapted to lighting book cases and display areas. We have developed hardware to mount through any hard surface. These products are designed as cord and plug items and will require a receptacle to plug them into behind the soffit. Call our Customer Service department at 800-428-5367 for assistance in designing your direct mount product.

CD-T24-81

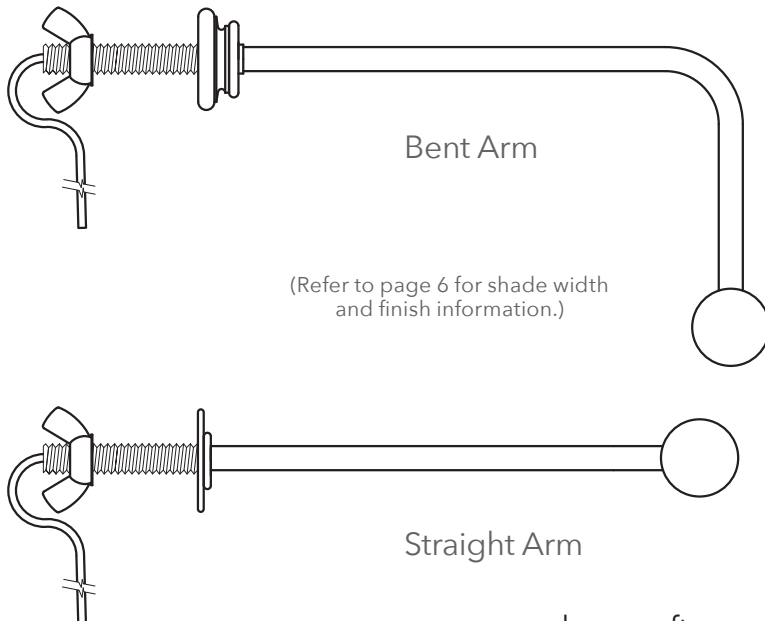

CD-SL16-51

Illuminate bookshelves with our Slim-line Library Lighting. The slim lamp profile is designed for interiors where reduced lamp visibility is desired.

Scatchard Stoneware

George Scatchard came to Vermont in 1960 to set up his first pottery as the back to the land movement in Vermont took hold. This artisan potter taught ceramics at the University of Vermont while continuing to create pottery in his own rural studio.

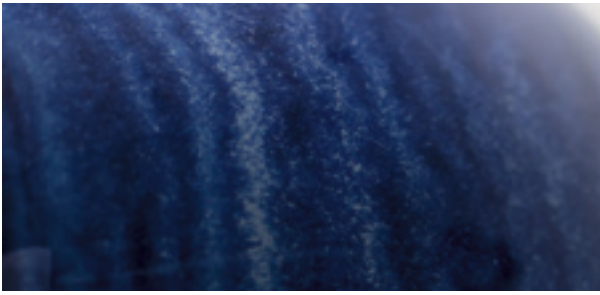

Scatchard design patterns are created from original hand thrown pieces then slip cast in a mold to improve consistency in shape and size.

Each piece is trimmed, glazed and signed by the potter, then fired at 2300° for 24 hours to create a beautiful and lasting surface.

Questions & Answers

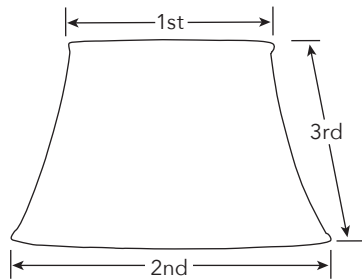

The following are answers to some of the most frequently asked questions about our products which should assist with your selection process.

Q. How do you measure the extension of a swing arm?

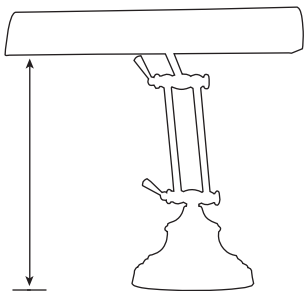

Q. How are lamp shades dimensioned in the catalog?

A. Top × Bottom × Side (slant).

Q. How do you measure the height of a Desk/Piano Lamp?

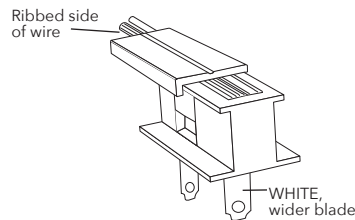

Q. What size picture light should I use?

A. Measure the width of the image and use a Classic picture light approximately one half the size, or a Slim-line picture light approximately two thirds the size of the image.

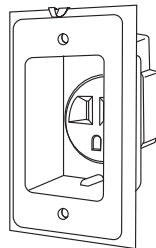

Q. Can I modify a cord length and add a polarized plug?

A. Yes. We offer a UL approved snap-on-plug that can be attached to any standard UL approved SPT-2 cord. Instructions are included with plug.

Q. Is there a way to eliminate seeing the cord?

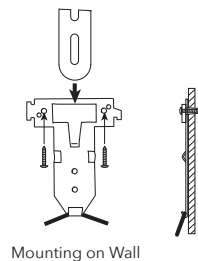

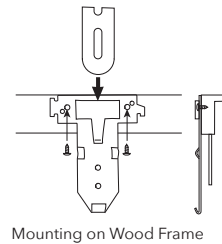

- Install a recessed outlet (sometimes called a "clock outlet") behind the artwork.

- Use a Cord Cover.
- Paint the cord to match the wall color.
- Place furniture, plants or other décor to hide cord.

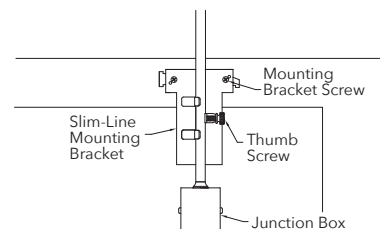

Q. How do you install a picture light?

A. All House of Troy picture lights come with mounting hardware and may be attached to either the picture frame or the wall. The only tools necessary are a screw driver and something to start a screw-hole, such as a small nail or awl.

Q. How do you install a Slim-line Picture Light?

A. Snap the Picture Light arms into the Mounting Brackets. This will take a bit of force, but will not damage the arms. Slide the arms up or down to attain the desired shade location in relation to the frame.
