

| ļ | TEE ASSEMBLY |
|---|---|
| | Thread TEE BODY (1) COUPLING NUT (2) to SPOUT SHANK (3). |
| | INSTALL VALVE BODIES Unpack valve assembly and remove HANDLE (10) by unthreading SET SCREW (12). Unthread ROSETTE (9) and FLANGE (8) removing them from VALVE BODY (2). Thread LOCKNUT (1) to bottom of VALVE BODY (2). Make sure SPACER (3), BRASS WASHER (4) and RUBBER WASHER (5) are installed. Insert VALVE BODY (2) through mounting hole from underside of lavatory or mounting surface. Installed in the left Mtg. hole, VALVE BODY marked Lold in the right when facing front of fitting. Maximum mounting surface thickness is 1-3/4". Install STOP RING (6) onto VALVE BODY (2) if not in place. Install OrRING (7) into groove in FLANGE (8). Thread FLANGE (8) flush against STOP RING (6). Thread ROSETTE (9) onto VALVE BODY (2) until tight against it's internal stop. Align VALVE BODY (2) and from below tighten LOCKNUT (1) to secure VALVE BODY (2). |
| | INSTALL HANDLES Turn VALVES to off position. Align HANDLES (10) as shown or as desired and install onto HANDLE ADAPTER (11). Tighten SET SCREW (12) with HEX WRENCH (13) supplied. Push PLUG BUTTON (14) into place. HOSE CONNECTIONS Tighten COUPLING NUT (12) on SUPPLY HOSE (17) to OUTLET (15) making water tight connection. Important: Loop SUPPLY HOSES (17) as shown so they do not kink. |

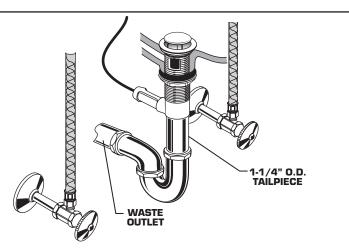

Connect HOT water supply to inlet of left SHANK and COLE water supply to right SHANK using sealant, appropriate connectors, and COUPLING NUTS.

CONNECT DRAIN

Connect 1-1/4" O.D. tailpiece on POP-UP DRAIN to waste outlet.

6

WASTE OUTLET

HOT

TEST INSTALLED FITTING

- With HANDLES (1) in OFF position, turn on WATER
 SUPPLIES (2) and check all connections for leaks.
- Remove AERATOR (3). First loosen aerator set screw with HEX WRENCH (4) supplied. Pull out AERATOR (3) with AERATOR KEY (5).
- Operate HANDLES (1) to flush water lines thoroughly.
- Replace AERATOR (3) and tighten set screw.

CHECK DRAIN CONNECTIONS

- Operate POP-UP KNOB (6) and fill Sink with water. Check that DRAIN STOPPER (7) makes a good seal and retains water in Sink. If STOPPER (7) does not seal properly, please refer to "Troubleshooting Guide" in these instructions.
- Push POP-UP KNOB (6) down and check all drain connections and "P" trap for leaks. Tighten if necessary.

TO CLEAN AERATOR

- AERATOR (3) may accumulate dirt causing distorted and reduced water flow. Remove AERATOR (3) and rinse clean.
- Replace AERATOR (3) and operate handles several times from OFF to ON position. Do not force, handles turn only 90°.

HELPFUL HINTS FOR CLEANING AND MAINTENANCE

The solid brass product you have just purchased has been designed to give you years of beauty and service. It is important to bring to your attention proper care and maintenance procedures, which will ensure its lasting beauty.

- First and foremost, it is important (as it is with any fine piece of jewelry or furniture) that the product be wiped clean and dry with a soft damp cloth after every use.
- Second, under no circumstances should an abrasive cleaner or combination cleaner/polish be used on JADO products. The abrasive nature of such products will eventually destroy the finish and void the warranty.
- In the event of stubborn blemishes shown on the finish, we recommend use of Windex window cleaner with a soft cloth, but we do not recommend it be used on an everyday basis.
- It is important to note that it is normal to expect signs of usage over time.

Thank you for selecting JADO for your home.

Speed Connect[™] Drain **Troubleshooting Guide**

- If sink does not hold water even though Stopper is in the "down" position: Follow CABLE ADJUSTMENT PROCEDURE
- If Stopper does not raise up fully or sink drains too slowly: Follow CABLE ADJUSTMENT PROCEDURE.
- If you need to remove the Stopper:
 - Follow STOPPER REMOVAL PROCEDURE.
- If you would like the ability to remove your Stopper simply by lifting it out of the drain: Follow STOPPER INSTALLATION PROCEDURE for "Unlocked" mode.

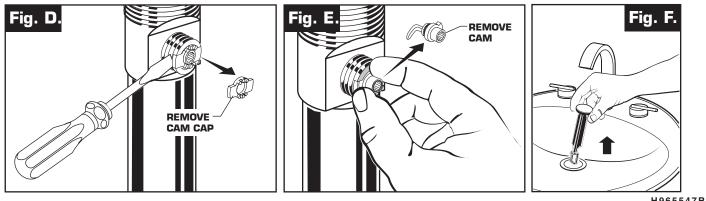

CABLE ADJUSTMENT PROCEDURE

- Disconnect the Cable from the Drain by threading the Cable Connector (1) counter-clockwise. Fig. A.
- Look at the area on the Drain Body where the Cable was attached and locate the component labeled as "Cam" in the illustration. Fig. B.
- Use a small screwdriver to rotate the Cam in the clockwise direction as far as it will go. At this point the Stopper should be in the UP position. Fig. B, C.
- Push DOWN on the Lift-Knob to make sure it is fully down. Fig. C.
- Re-attach the Cable to the Drain Body Connection (2) by threading the Cable Connector (1) clockwise onto the Drain Body Connection (2) and hand-tighten. Fig. A.

STOPPER REMOVAL PROCEDURE

- Disconnect the Cable from the Drain by threading the Cable Connector (1) counter-clockwise. Fig. A.
- Look at the area on the Drain Body where the Cable was attached and locate the component labeled as "Cam" and "Cam Cap" in the illustration. Fig. B.
- Use fingers or small screwdriver under either side of the Cam Cap to pry it out from the Drain. Fig. D.
- Remove the Cam by pulling it straight out while wiggling gently to loosen the Rubber Seal. Fig. E.
- The Stopper can now be removed by lifting it out of the Drain. Fig. F.

STOPPER INSTALLATION PROCEDURE

The Stopper can be installed two ways, "Locked" Mode (Stopper cannot be removed) or "Unlock" Mode (Stopper is removable).

Locked Mode:

- Look at the Plastic Loop at the bottom of the Stopper and notice that the Loop is on one side of the Stopper. Fig. G.
- To install the stopper in "Locked" mode, insert the Stopper into the Drain so that the Plastic Loop is facing toward the **rear** of the Sink. Rotate Stopper slightly if necessary so that the Stopper slides all the way down. Fig. G.
- Re-install the Cam into the Drain, rotating the Cam if necessary to make sure it is fully inserted. Fig. J.
- Re-install the Cam Cap, making sure the guide teeth are facing outward. If the Cam Cap does not "snap" into place, then rotate the Cam to make sure it is fully inserted. Fig. K.
- Re-attach Cable. See "CABLE ADJUSTMENT PROCEDURE" in Troubling Shooting Guide to complete installation. Stopper will be in "Locked" mode and not be removable.

Unlocked Mode:

Look at the Plastic Loop at the bottom of the Stopper and notice that the Loop is on one side of the Stopper. Fig. H.

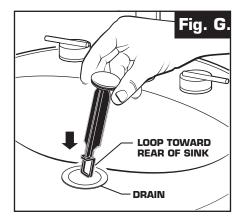

- To install the stopper in "Unlocked" mode, insert the Stopper into the Drain so that the Plastic Loop is facing toward the **front** of the
- Sink. Rotate Stopper slightly if necessary so that the Stopper slides all the way down. Fig. H.

Re-install the Cam into the Drain, rotating the Cam if necessary to make sure it is fully inserted. Fig. J.

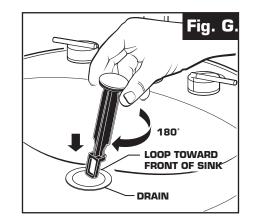

- Re-install the Cam Cap, making sure the guide teeth are facing outward. If the Cam Cap does not "snap" into place, then rotate the Cam to make sure it is fully inserted. **Fig. K.**

Re-attach Cable. See "CABLE ADJUSTMENT PROCEDURE" in "Troublingshooting Guide" to complete installation. Stopper will be

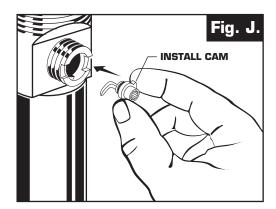

in "Unlocked" mode and removable.

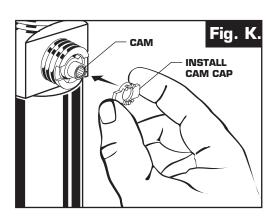

Unlocked Mode

TO THE PURCHASER OF JADO BRASS PRODUCTS

Attention installer: **Please leave This Pamphlet for The Owner**

NOTICE: JADO products conform to industry requirements of water conservation under the ASTM / ANSI A112.18.1-2005 plumbing code. Lavatory, bidet, wet bar and kitchen faucet sets have a maximum flow rate of 2.2GPM. Shower heads, hand showers and body sprays have a maximum flow rate of 2.5GPM.

The state of California has mandated under Proposition #65 that manufactures of products, including faucets which come into contact with potable water, must warn the consumer if the product contains materials listed by the state as a carcinogen or reproductive toxin. Lead, which is contained in all brass faucets in limited amounts appears on the State's list.

Preliminary industry tests have indicated that users of faucets made from brass face no significant danger, however, California Proposition #65 requires that we provide you with the following notice

> Warning: This product contains an element known to the State of California to cause cancer of reproductive harm

JADO BATHROOM AND HARDWARE MFG. CORP. 6615 West Boston Chandler, AZ 85226
