SMART
LIGHTING
## WITH NETATMO

legrand®

designed to be better®

A PERFECT
SMART LIGHTING SOLUTION
FOR EVERY HOME.

Providing advanced control of lights and power, from anywhere, adorne® and radiant® with Netatmo deliver the comfort, safety and convenience of Smart Lighting with unprecedented range and ultra-reliability to fit any home's wants, needs and style.

COMFORT

Turn on lights from wherever you go, giving you the comfort needed to enjoy life.

SAFETY

Schedule lights for your arrival, or dim lights to safely navigate the house at night.

CONVENIENCE

Conveniently schedule lights or appliances to go on/off automatically, all from an easy-to-use app or with a voice command.

SMART &
GOOD-LOOKING.

Available from the adorne® and radiant® Collections, Legrand's selection of smart devices elevate any space with exceptional style. Coordinate with other designer switches and outlets for a cohesive look throughout the home and the perfect finishing touch for every room.

adorne® WITH Netatmo

Bold and beautiful, in the signature square. Select wall plates for your adorne smart devices from over 30 color and finish options.

radiant® WITH Netatmo

Clean lines and classic colors, for a sophisticated touch. Coordinating wall plates included with radiant smart devices.

MIX
& MATCH

Combine Netatmo-based devices from both collections to complement any home's style and décor.

BUILDING YOUR PERFECT SMART LIGHTING WITH NETATMO SYSTEM

STEP 1) SELECT YOUR GATEWAY

Choose between in-wall and surface-mount versions to select a Gateway that best fits your style and setup. As the foundation of the system, the Gateway connects to a home's Wi-Fi network* before establishing a robust, dedicated mesh network to support up to 98 smart switches, dimmers and/or outlets with Netatmo.

*We recommend installing the Gateway near the home's Wi-Fi router for optimal performance.*

Smart In-Wall Gateway

Installs in a box in place of a switch or outlet to create a robust, dedicated network.
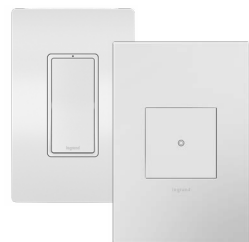

CHOOSE ONE

Smart Surface-Mount Gateway

Installs beside a single-gang switch or outlet, no back box or network wiring required.
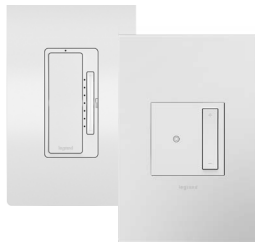

STEP 2) SELECT YOUR WIRED OR PLUG-IN DEVICES

Next, select a wired (or plug-in) smart device for each light or load you wish to control. Replacing any standard or existing switch, dimmer or outlet in minutes, these devices also act as repeaters to strengthen the system's network.
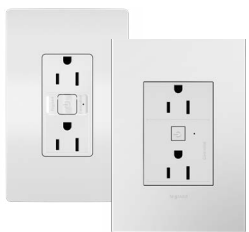

Smart Switch

Provides on/off control of lights from anywhere. Use alone for single-pole applications or in conjunction with a Wireless Smart Switch (see Step 3) for 3-way control.

Smart Tru-Universal Dimmer

Provides on/off and light level control from anywhere. Works with virtually any 120V dimmable bulb or fixture (excludes 0-10V). Use alone for single-pole applications or in conjunction with a Wireless Smart Dimmer (see Step 3) for 3-way control.

Smart 15A and 20A Outlets

Allows control of plugged-in appliances, electronics or lights. One outlet is controlled, the other is always on. Can also be paired with a Wireless Smart Switch (see Step 3).
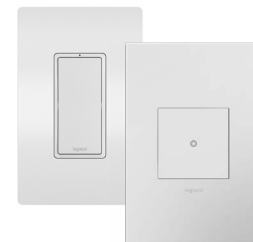

Smart Plug-In Switch and Smart Plug-In Tru-Universal Dimmer

Plugs into an existing outlet to offer smart control, no installation required. Can also be paired with a Wireless Smart Switch or Dimmer (see Step 3).

## STEP 3) SELECT YOUR WIRELESS DEVICES

To expand a system to fit a home's unique wants and needs, add devices for easy 3-way control, one-touch scene control, even motion-activated lighting, wherever it's wanted. No cutting or wiring required, these battery-powered options mount to any wall or surface with included adhesive.

Wireless Smart Switch and Wireless Smart Dimmer

Use for easy 3-way control (or even up to 20-way) when paired with a wired Smart Switch or Smart Tru-Universal Dimmer (see Step 2).

Or use wireless devices as a master switch or dimmer, connecting to up to 20 wired devices to control their lights/loads from a single on-wall location.

Home/Away Wireless Smart Switch and Wake/Sleep Wireless Smart Switch

Delivers one-touch scene control of either Home/Away or Wake/Sleep scenes (created in app). Perfect for adding convenience in entryways or bedrooms.

Wireless Smart Scene Controller

Mounts to any wall to deliver one-touch scene control of four additional lighting scenes (created in app). Enjoy the same control on-the-go with the 4-Scene Pocket Remote Control.
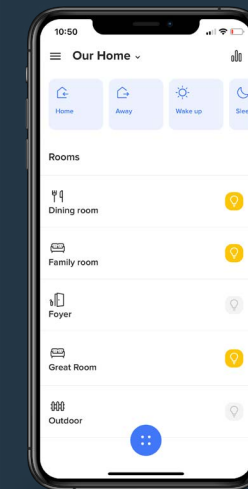

Wireless Motion Sensor

Turns lights (indoors or out)* on/off based on motion detection for additional security and comfort. Controls up to 20 lights/loads.

Place 6 – 8 feet high, out of direct sunlight and with unobstructed view of room or area for optimal performance.

The smartest way to take control of lights and power, optimized for an ultra-reliable whole home experience.

Leveraging leading smart home technology to establish a robust and dedicated mesh network, adorne® and radiant® with Netatmo are smart lighting solutions designed for whole-home use. Start with a Smart Gateway, then watch the network get stronger with every switch or outlet you add. All for dependable performance throughout an entire home — even in areas where Wi-Fi signals typically struggle.

Plus, with a variety of gateways, switches, dimmers and outlets available – including battery-powered, wireless switches for easily adding 3-way control anywhere you want it – these solutions can be custom fit to your needs. Then simply connect with **Amazon Alexa**, **Google Home** or **Apple HomeKit**, or integrate with home automation systems, for next-level control.

MORE CONTROL, LESS WASTE.

The adorne and radiant with Netatmo solutions provide incredible visibility to a home's energy usage through the app, helping reduce energy cost and waste. Monitor, manage, and more, with Netatmo.
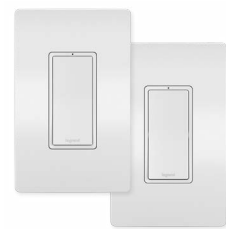

Manage lights and power, from anywhere, with the Legrand Home + Control app.

NO NEW WIRES; NO GATEWAY:
Meet the radiant® with Netatmo Easy Kits

Using the power of our Netatmo platform, these kits make it easy to add on-wall control anywhere it's wanted — no cutting, no pulling wire, and no Gateway required. Available in three options, the Easy Kits include a set of pre-paired wired and wireless devices for the addition of 3-way or switched outlet control in mere minutes. Perfect for larger rooms or those without overhead lighting.

Can be expanded for 4-way control (or more) by adding more wireless devices. Or, go ahead and add a Gateway to upgrade these kits for app control and other smart features. Visit legrand.us/addappcontrol to learn more.

Easy 3-Way Switch Kit

Add a wireless switch for control of a light or fixture from a second on-wall location.
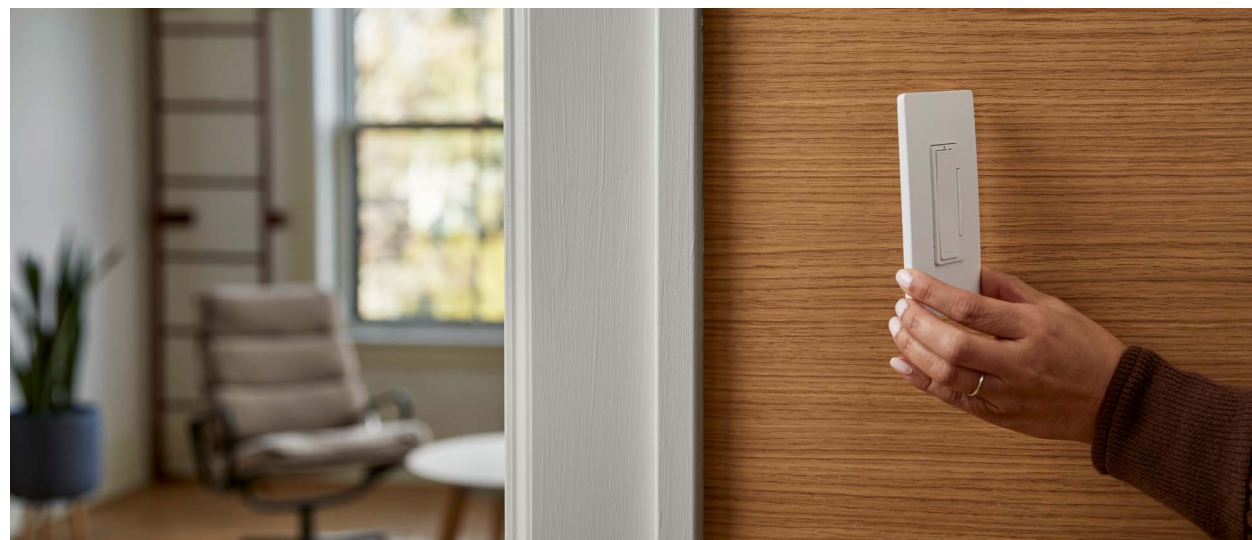

Ideal for locations where you want to add another switch.

Easy 3-Way Dimmer Kit

Add a wireless dimmer for light-level control of a light or fixture from a second on-wall location.

Ideal for locations where you want to add another dimmer.

Easy Switched Outlet Kit

Add a wireless switch for on-wall control of a lamp or other plugged-in appliance.

Ideal for locations where you want to control a lamp from a switch.
