# Little GIANT®

## PES-120-PW SERIES

#### **Features**

- Energy efficient
- Corrosion resistant body
- Built-in flow control
- Bottom intake
- 6' power cord
- 4' maximum lift
- 8 watts
- Discharge accepts 3/8" or 1/2" I.D. tubing

#### Construction

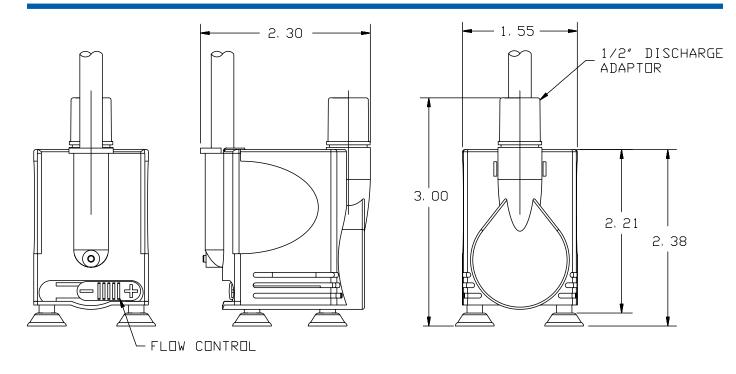

- Motor Wet-rotor (hysteresis) epoxy encapsulated
- Intermittent Liquid Temp. up to 120°F
- Discharge 3/8" or 1/2" Slip
- Housing ABS
- Cover ABS
- Volute ABS
- Impeller Acetal
- Screen ABS

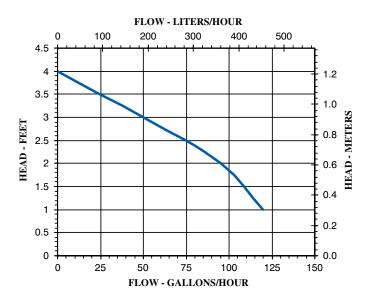

This wet-rotor pump, often referred to as a magnetic-drive pump by other manufacturers, utilizes an epoxy-encapsulated motor and plastic housing. A permanent magnet is attached to the impeller. The magnet acts as the rotor would in a conventional motor. The water being pumped surrounds the rotor, thus the term "wet-rotor". It is seal-less and oil-less. This pump works well in water garden, statuary and some industrial applications. It is compact in design and is the most energy efficient type of pump Little Giant manufactures. The other side of this efficiency is very little starting torque. Therefore, the pump does not produce as much pressure and will not pump water as high as its epoxy-encapsulated, direct-drive counterpart.
