

## COPPER KETTLE MODEL FP-CK-C

### INTRODUCTION

This instruction sheet provides you with the information required to safely own and operate your product. Retain these instructions for future reference.

The product you have purchased is of the highest quality workmanship and material, and has been engineered to give you long and reliable service. This product has been carefully tested, inspected, and packaged to ensure safe delivery and operation. Please examine your item(s) carefully to ensure that no damage occurred during shipment. If damage has occurred, please contact the place of purchase. They will assist you in replacement or repair, if required.

**READ THESE INSTRUCTIONS CAREFULLY BEFORE ATTEMPTING TO INSTALL, OPERATE, OR SERVICE YOUR PRODUCT. KNOW THE PRODUCT'S APPLICATION, LIMITATIONS, AND POTENTIAL HAZARDS. PROTECT YOURSELF AND OTHERS BY OBSERVING ALL SAFETY INFORMATION. FAILURE TO COMPLY WITH THESE INSTRUCTIONS COULD RESULT IN PERSONAL INJURY AND/OR PROPERTY DAMAGE!**

#### SAFETY GUIDELINES

Disconnect the pump from power before servicing or removing any component. Do not use to pump flammable or explosive fluids such as gasoline, fuel oil, kerosene, etc. Do not use in explosive atmospheres. Pump should only be used with liquids compatible with pump component materials.

Do not handle pump with wet hands or when standing on a wet or damp surface or in water.

This pump is supplied with a grounding conductor and/or grounding type attachment plug. To reduce the risk of electric shock be certain that it is connected to a properly grounded grounding type receptacle.

The National Electric Code (in the USA) and similar codes in other countries require a Ground Fault Circuit Interrupter (GFCI) to be installed in the branch circuit supplying fountain equipment rated above 15 volts. Little Giant recommends that each pump be used with a GFCI.

Do not allow children or infants to play near the fountain due to drowning hazard.

#### ELECTRICAL CONNECTIONS

1. Check the pump label for proper voltage required. Do not connect to voltage other than that shown.
2. If pump is supplied with a 3-prong electrical plug, the third prong is to ground the pump to prevent possible electrical shock hazard. **DO NOT REMOVE** the third prong from the plug. A separate branch circuit is recommended. Do not use an extension cord. Do not cut plug from the cord. Cutting the plug or shortening the cord will void the warranty.

FIGURE 1

#### ASSEMBLY AND OPERATION

1. Remove the fountain assembly and all packaging from the box and place them on a smooth, flat surface. **NOTE:** The suction cups and adapter are not required for this application and therefore not included.
2. Remove the jug from the kettle.
3. Locate the flexible tubing on the jug and connect the tubing to the pump (Figure 1).
4. Feed the electric plug through the center hole at the top of the kettle (Figure 2) and then through the 1-1/8" hole in the side of the basin. The pump should rest on the bottom of the kettle.
5. Fill the inside of the kettle with water, ensuring that the pump is fully submerged.
6. Seat the jug onto the kettle in its location hole.
7. Connect the pump to power and allow 10 seconds for the jug to fill with water.
8. Use the adjustment on the pump to regulate the flow of water.

#### MAINTENANCE

1. Do not allow the pump to run without water or allow to freeze.
2. Clean fountain only with water. **DO NOT USE BLEACH.** It may tarnish the applied finish.

#### TROUBLESHOOTING

PROBLEM	CORRECTIVE ACTION
Pump is not working.	Check the power outlet. Refer to manufacturer's instructions.
Pump is working but water is not flowing.	Check for kinks in the tube. Make sure that the pump is submerged. Make sure that the pump is free of debris and that the impeller runs freely by cleaning the inside of the pump.

#### WARRANTY

One year limited warranty from date of purchase. Contact the manufacturer for all warranty details.
