CUTS LABOR COSTS IN HALF

FLUORESCENT LAMP AND BALLAST TESTER

2210-20

FLUORESCENT LAMP AND BALLAST TESTER
CUTS LABOR COSTS IN HALF

INCREASE PRODUCTIVITY

- Diagnose lamp, ballast, and pin failures in seconds

- Detect if an electronic ballast is working properly without removing the lamps or ballast cover plate

- Test the working condition of fluorescent lamps before or after installing

- Small portable size fits in pockets, tool belts and most carry cases

EASY TO USE

- 2.5' retractable antenna for extended testing reach and portable carrying

- Built-in LED flashlight illuminates dark work spaces

- Visual and audible alerts for ballast and pin tests

Removable antenna adapter
improves lamp test response

Built-in LED work light
illuminates dark work spaces

2.5' fully retractable antenna
for extended reach when testing

Visual and audible indicators
provide easy feedback

Complete 3-in-1 solution – test lamps, ballasts and pins

Dial and buttons
positioned for one-handed use

Durable tool
continues to work after 6.5 foot drop

Rugged over-molding
for increased durability and grip
