Wood is a natural product and characteristics such as graining, mineral streaking, knots, etc., must be expected. The degree of variation can vary widely within a species and also as a result of environmental conditions prior to harvest.

All wood and laminate flooring should be protected from intense natural and/or artificial UV light exposure to minimize color change.

## PRODUCT SPEC SHEET

**Janka Wood Hardness Scale is a good indicator of a wood species' resistance to indentations, however all wood will dent and scratch.**
