Installation manual	889

※ To request a French version of the Owner's guide or Installation manual, contact Noritz America.

Thermal Fuse Installation Procedure

Install the thermal fuse following the below procedure.

1. Begin the installation by attaching the thermal fuse to the right side of the heat exchanger.
2. Bend the thermal fuse to the back of the heat exchanger and fixing the thermal fuse by the fastener at attachment point 1 as indicated in the above illustration.
3. Continue wrapping the thermal fuse around the heat exchanger securing it at each attachment point using the fasteners shown in the above illustrations.

Caution

The thermal fuse may snap if it is twisted, pinched or bent too sharply. Do not bend the thermal fuse to a radius of less than 1.25".

Freeze Prevention Heater Installation Procedure

Please check the present position and re-install to the original position.
Install the freeze prevention heater according to following illustrations.
