P8591	-31	300	Yes	No	No	4	5	10
P8592	-31	600*	Yes	No	No	4	4-1/2	12

*2/300w circuits

Specifications:

Electrical

- Multiple secondary taps of 12,13, & 14 volts allow for short and long runs
 - 300 and 600 watt units only
 - Maximizes light output and lamp life under varying load conditions
 - Adjusts for light loss in longer runs
- Isolation type transformer for safe operation
- Three foot 12 gauge cord with grounding plug
- Thermostat in primary to prevent overheating
- Resettable circuit breakers in secondary circuit to protect lighting components
- 12v euro style terminal board makes wiring simple and fast
- Operating voltage: 120V input, 12V output, 60hz

Construction

- Black powder coat finish on steel
- Epoxy encapsulated transformer for quiet and cool operation
- Weatherproof construction
- Easy open closure with KO's for hardwiring and photocontrol installation

Mounting

- Vertical mounting
- Top mounting bracket with keyhole slot is attached to housing
- Bottom mounting bracket with slot is attached to housing
- Can be mounted anywhere outdoors

Labeling

- UL-CUL wet location listed
- Made in USA
