## How to Install MR11 Bulb and Matrix<sup>™</sup> Pendant:

Pendants may be mounted to monorail systems, monopoints or line voltage track by coupling to the quick connect transformer adapter. Attached to the socket is a cable that may be cut on site during installation to any length (see instructions below).

1 Position the pendant grid against the socket and secure in place by screwing the metal collar onto the socket.

2 Plug bulb carefully but completely into socket. Use only an MR11 glass covered lamp bulb.

## How to Shorten the Cable:

**3** Cut the cable cleanly with wire cutter to desired length, and slide brass collar over wire. Position collar so that a small section (1/16") of braided wire protrudes from the top of the collar.

**4** Grasping the collar, slide braided outer wire back to expose inner wire. Trim 1/8" of insulation from the inner wire with wire stripper.

**5** Feed inner wire into quick connect adapter until it reaches top set screw. Feed braided outer wire and brass collar into quick connect.

**6** Tighten top set screw first, then lower set screw snugly. Smooth out any bulges in braided wire.

**7** Screw quick connect into quick connect adapter until it seats. If you adjust the orientation of the pendant, be careful not to loosen the connection.

**8** A For Standard Color trimsets: Hang A and B bead chains first, following the Crystal Color Map. Drop strands of crystal beads through slots in top grid. Make sure to follow A - B pattern shown.

**B** For Premium Color trimsets: Hang A bead chains first, following the Crystal Color Map. Drop strands of crystal beads through slots in top grid.

**9** Grasp C chain of crystal by the top crystal. Slip the chain through side opening of the grid slit. It will nest into position between the top and second crystal.
