Vino Series Stemware Rack

The Vino Series Stemware Rack is the same product as the standard Vino Rails (VR) with adjusted spacing to hold two typical red wine-sized glasses.
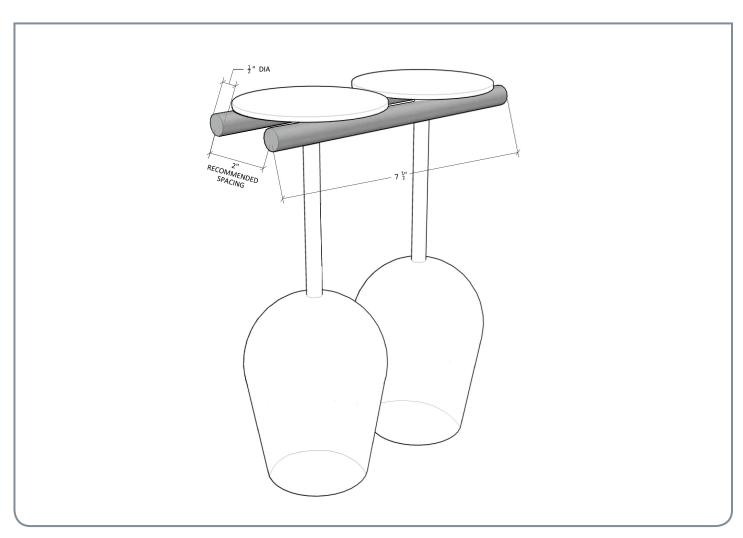

Video guides, spec sheets, and additional support are available at http://vintageview.com/support.

Parts List

- (2) Vino Rails
- (2) Wood studs
- (2) Nuts or 2.5mm Hex Key

Required Tools

- Level
- (2) 10mm (or adjustable) wrenches
- Drill
- 5/32 (4mm) drill bit

VR-SR

This configuration can be installed into 1/2" + thick wood surfaces

Step 1: Verify wall surface

Verify wood thickness is at least 1/2" thick.

Step 2: Mark mounting hole locations

Mark the center-point of the first rail and, using a level to ensure the marks are on the same horizontal plane, mark the center-point of the second rail 2 inches (51mm) away (figure a).

3.25"
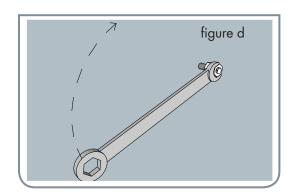

2"

Step 3: Drill the anchor holes

Drill a 5/32 inch (4mm) pilot hole at the marked hole locations (figure b). If you do not hit a stud or solid wood, you will need to use Vino Series Stemware Rack with Collars (VRC-SR).
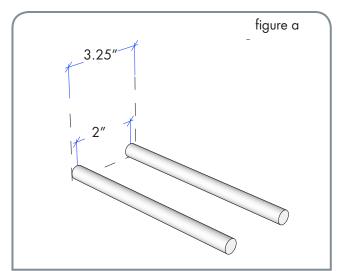

figure b

## Step 4: Install the Wood Studs

If supplied, use the hex key to drive the Machine/Lag Studs into the holes until the coarse threads of the lag screw are no longer visible.
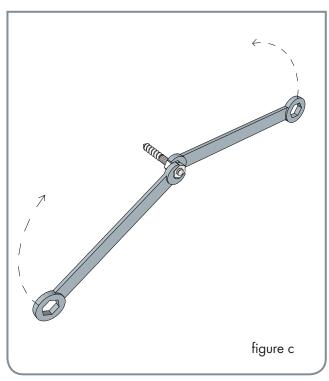

Otherwise, thread 2 nuts onto the fine threaded end of one Machine/Lag Studs and using two 10mm wrenches, tighten the nuts against one another (figure c). With the nuts tightened against each other, use one wrench on the outer nut and screw the lag end into the pilot hole in the wall.

Thread the bolt into the wall until the coarse threads of the lag screw end are no longer visible, leaving just the finer threads exposed (figure d). Again using 2 wrenches, loosen the nuts and remove them from the fine threaded end of the stud.

Step 5: Install the Rails

Screw a Vino Rail clockwise onto an anchor and firmly hand-tighten in place (figure e). Repeat the process for the second Vino Rail, using a level to ensure both are alligned.

Step 7: Add Glass

Slide your two favorite wine glasses in and enjoy.

Maintenance and Care: The Vino Series Stemware should be regularly checked for tightness. Should any part be found loose, tighten appropriately until secure.

If the face of the wall surface shows signs of breakage, discontinue use immediately until such time as the wall may be adequately repaired.

Vino Series Stemware may be cleaned with a damp cloth and mild dish soap — abrasive cleaners, abrasive pads or steel wool should NOT be used as they will damage the finished surfaces of the parts.
