| Е | Depth (Includes only the product body that is loaded into the cabinet.Excludes door, drawer, and handles) | 24 3/4" |
| F | Depth (Excludes Door Handle) | 26 7/8" |
| G | Depth when drawer is fully opened | 36 1/16" |
| Н | Depth when door is fully opened | 48 5/8" |

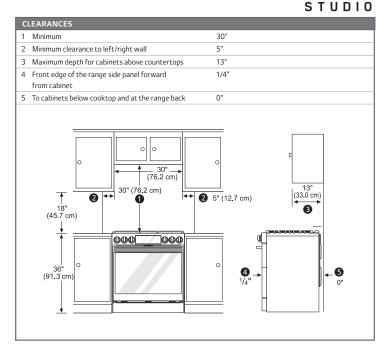

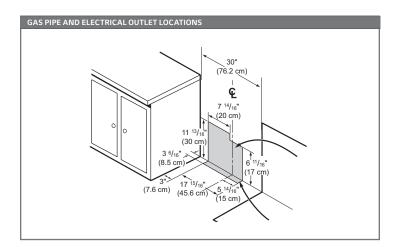

CONNECTING GAS

Providing Adequate Gas Supply

- Your range is designed to operate at a pressure of 5" of water column on natural gas or 10" of water column on LP.
- Make sure you are supplying your range with the type of gas for which it is
- This range is convertible for use on natural or LP gas. When using this range on LP gas, conversion must be made by a qualified LP installer before attempting to
- For proper operation, the pressure of natural gas supplied to the regulator must be between 5" and 13" of water column.
- For LP gas, the pressure supplied to the regulator must be between 10" and 13" of water column. When checking for correct operation of the regulator, the inlet pressure must be at least 1" more than the operating (manifold) pressure as
- The pressure regulator located at the inlet of the range must remain in the supply line regardless of which type of gas is being used.
- A flexible metal appliance connector used to connect the range to the gas supply line should have an I.D. of 5/8" and a maximum length of 5 feet. In Canada, flexible connectors must be single wall metal connectors less than 6 feet in length.

CONNECTING ELECTRICITY

Electrical Requirements

- 120 Volt, 60 Hz, properly grounded dedicated circuit protected by a 15 or 29 Amp circuit breaker, or slow blow fuse.
- If an external electrical source is utilized, the appliance, when installed, must be electrically grounded in accordance with local codes or, in the absence of local codes, with the National Electrical Code, N=PA70 or the Canadian Electric Code, CSA C22.1-02.

Grounding

- For personal safety, this appliance must be properly grounded.
- Do not, under any circumstances, cut or remove the third (ground) prong from the power cord.
- The customer should have the wall receptacle and circuit checked by a qualified electrician to make sure the receptacle is properly grounded.

44.2A (120VAC, 60Hz) Amp Rating at 240\
