FRCNSTR100 - Franke Water Filtration System

The FRCNSTR100 water filtration system – superior performance with the environment in mind!

This addition to the Franke water filtration line provides users with the functionality and dependability expected from a Franke product. It features an innovative compact design and is constructed using a highly recyclable BPA-free thermoform polymer. Here are just a few of the product's many features:

- Quarter turn action simultaneously shuts off the water supply and unlocks the filter body to prevent leaks.
- An enclosed filter body design allows for quick cartridge replacements with less mess.
- System uses the same low-waste FRC05 and FRC06 replacement cartridges as the Franke FRCNSTR.
- An integrated mounting bracket and push fit connections allow for easy installation.
- All units come with a 10 year limited warranty.

An environmentally friendly and responsible alternative to those wasteful “throw away” filtration systems. The new Franke FRCNSTR100...

for water with taste as good as yours!

Other specification details:

- 3/8” polypropylene tubing
- Head: Polyoxymethylene (POM) – an engineering thermoplastic polymer.
- Body: Polybutylene terephthalate (PBT) – an engineering thermoplastic polymer.
- Highly recyclable polymers
- Uses FRC05 & FRC06 filters w/ proprietary threading.
- All materials are BPA free.

Note: BPA Free, means that this product is free of Bisphenol A. BPA is a synthetic estrogen used in the manufacture of polycarbonate and plastic. Scientific studies have shown that it can cause hormonal changes and negatively affect our health.
