Assembling

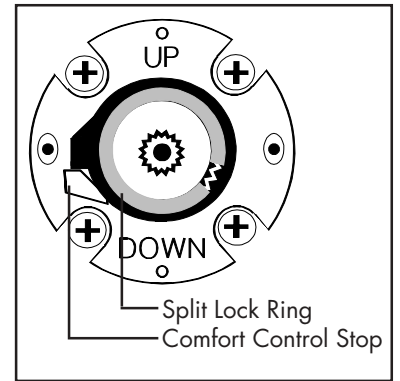

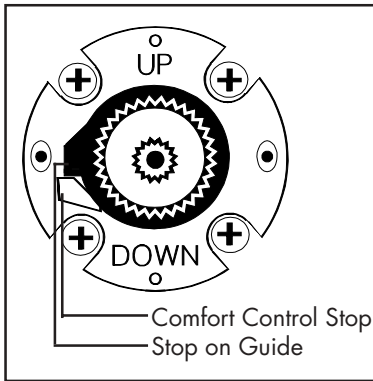

1.

Remove the two screws from the finish wall template, then remove the template.

2.

Stop and check valves must be in full open position. Push the handle onto the stem just enough so that the valve can be opened and closed. Open the valve until maximum desired hot temperature is discharging. Remove the handle. Place the adjustable comfort control stop over the plastic guide. Push the split lock ring down over the stem until it snaps into the groove directly above the comfort control stop. Close the valve. Install the sleeve and the escutcheon onto the valve.

3.

**Mondial 15518XX1/
Starck 10408XX1/
Terrano 37408XX1/37508XX1**

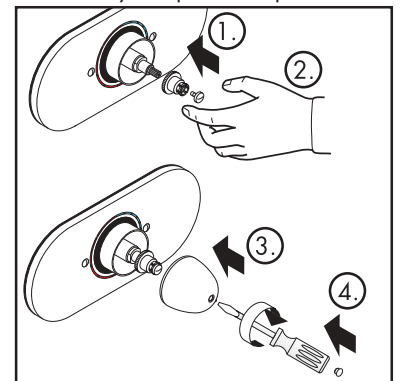

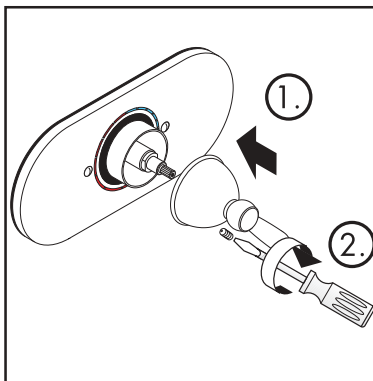

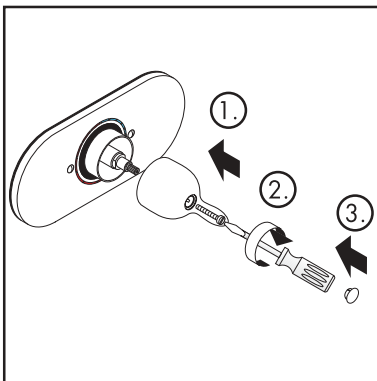

Push the handle onto the stem so that the handle covers the "OFF" position on the escutcheon. The handle has to be fixed with the screw. Cover the hole by the plastic cap.

**Carlton 17408XX1/17508XXX
Phoenix 17418XX1**

Push the handle onto the stem so that the handle covers the "OFF" position on the escutcheon. The handle has to be fixed with the screw.

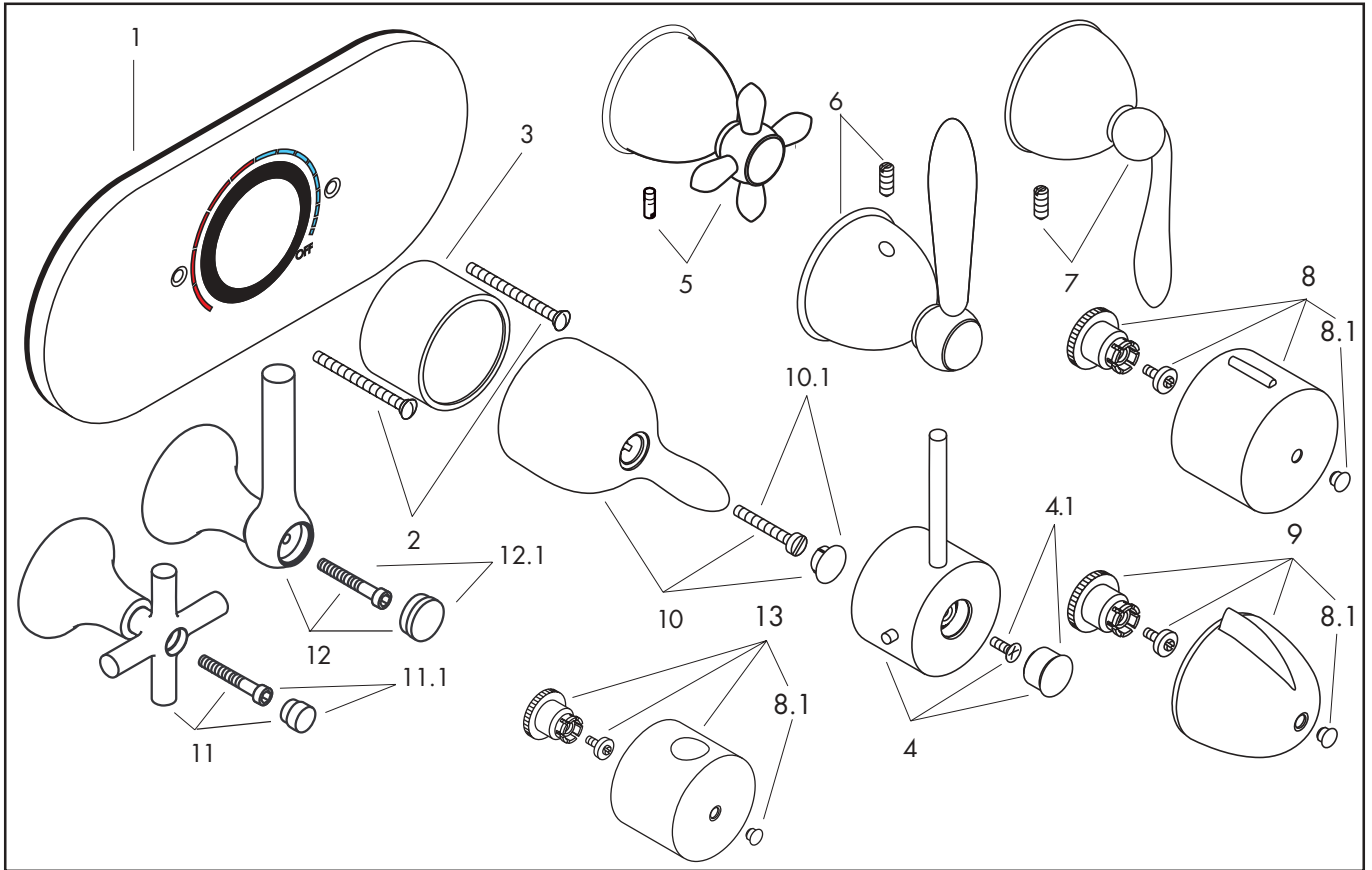

**Mondial/Metris/Elegance/
Sportive 15418XX1/
Allegroh 36408XX1/
Steel 35408801/Uno 38408XX1**

Push the handle adapter onto the stem. Lock the screw by hand only three turns. Snap on the handle so that the small nose of the handle points at the "OFF" position on the escutcheon. Fix the screw. Cover the hole by the plastic cap.
