Form# 45045-01 20090119 ©2009 Hunter Fan Co.

Welcome

۲

Your new Hunter[®] ceiling fan is an addition to your home or office that will provide comfort and performance for many years. This installation and operation manual gives you complete instructions for installing and operating your fan.

We are proud of our work. We appreciate the opportunity to supply you with the best ceiling fan available anywhere in the world.

Before installing your fan, for your records and warranty assistance, record information from the carton and Hunter nameplate label (located on the top of the fan motor housing).

Cautions and Warnings

• READ THIS ENTIRE MANUAL CAREFULLY BEFORE BEGINNING INSTALLATION. SAVE THESE INSTRUCTIONS.

- Use only Hunter replacement parts.
- To reduce the risk of personal injury, attach the fan directly to the support structure of the building according to these instructions, and use only the hardware supplied.

 (\bullet)

- To avoid possible electrical shock, before installing your fan, disconnect the power by turning off the circuit breakers to the outlet box and associated wall switch location. If you cannot lock the circuit breakers in the off position, securely fasten a prominent warning device, such as a tag, to the service panel.
- All wiring must be in accordance with national and local electrical codes and ANSI/NFPA 70. If you are unfamiliar with wiring, use a qualified electrician.
- To reduce the risk of personal injury, do not bend the blade attachment system when installing, balancing, or cleaning the fan. Never insert foreign objects between rotating fan blades.
- To reduce the risk of fire, electrical shock, or motor damage, do not use a solid-state speed control with this fan. Use only Hunter speed controls.

Installer's Choice and Optional Accessories

34° Max

۲

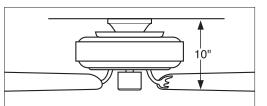

Understanding Mounting and Installer's Choice®

Hunter's patented 3-position mounting system provides you maximum installation flexibility and ease. You can install your Hunter fan in one of three ways, depending on ceiling height and your preference: Low Profile, Standard, or Angle mounting. The steps in this manual include instructions for all three Installer's Choice mounting methods.

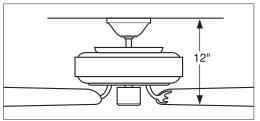

Considering Optional Accessories

۲

Consider using Hunter's optional accessories, including a wall-mounted or remote speed control. To install and use the accessories, follow the instructions included with each product. For quiet and optimum performance of your Hunter fan, use only Hunter speed controls.

Low Profile Mounting fits close to the ceiling, recommended for ceilings less than 8 feet high

Standard Mounting hangs from the ceiling by a downrod (included), recommended for ceilings 8 feet or higher

۲

Pitch 8

Angle Mounting recommended for a vaulted or angled ceiling

For ceilings higher than 8 feet, you can purchase Hunter extension downrods. All Hunter fans use sturdy 3/4" diameter pipe to assure stability and wobble-free performance.

1 • Getting Ready

۲

To install a ceiling fan, be sure you can do the following:

- Locate the ceiling joist or other suitable support in ceiling.
- Drill holes for and install wood screws.
- · Identify and connect electrical wires.
- · Lift 40 pounds.

If you need help installing the fan, your Hunter fan dealer can direct you to a licensed installer or electrician.

Gathering the Tools

You will need the following tools for installing the fan:

- Electric drill with 9/64" bit
- Standard screwdriver
- Phillips-head screwdriver
- Wrench or pliers

Checking Your Fan Parts

Carefully unpack your fan to avoid damage to the fan parts. Check for any shipping damage to the motor or fan blades. If one of the fan blades was damaged in shipment, return all the blades for replacement.

()

If any parts are missing or damaged, contact your Hunter dealer or call Hunter Parts Department at 888-830-1326.

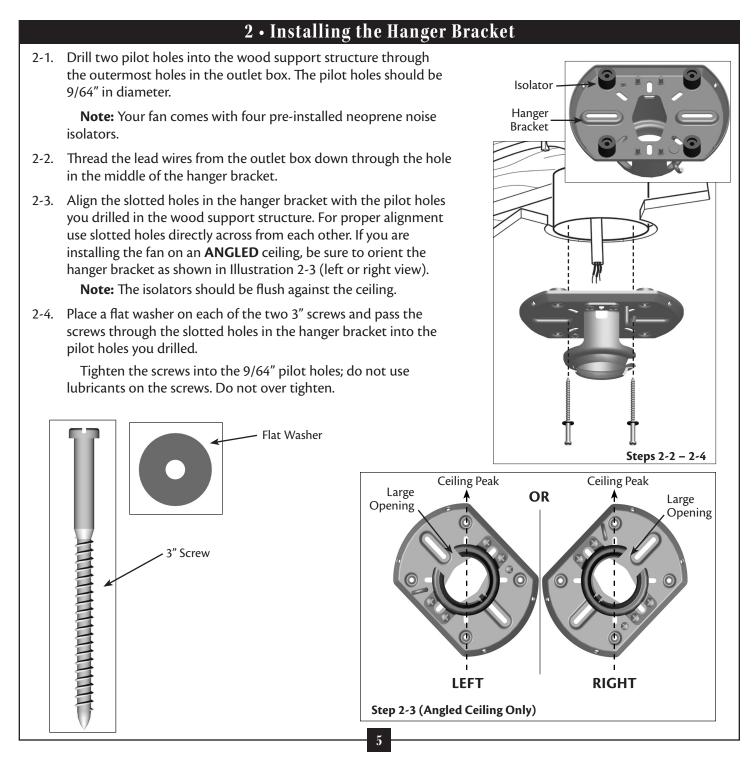

Preparing the Fan Site

Before you begin installing the fan, follow all the instructions in the pullout sheet called "Preparing the Fan Site." Proper ceiling fan location and attachment to the building structure are essential for safety, reliable operation, maximum efficiency, and energy savings.

Installing Multiple Fans? If you are installing more than one fan, keep the fan blades in sets, as they were shipped.

3 • Assembling and Hanging the Fan

۲

Indent Steps 3-4 – 3-5

()

You can assemble your fan for **standard** or **angled** mounting as shown in steps $3 \cdot 1 - 3 \cdot 3$. For **low profile** mounting (ceilings less than 8 feet high), go to steps $3 \cdot 6 - 3 \cdot 9$ on the next page.

- 3-1. To assemble fan to hang down from a flat or angled ceiling, place the canopy and canopy trim ring around the adapter so that they rest on the fan assembly.
- 3-2. Feed the wires from the fan through the downrod. **Note:** Make sure all the wires are on the same side of the metal

dowel pin inside the dowrod.

3-3. Loosen the square head setscrew on the adapter to install the pipe and ball assembly. **Note:** When the pipe and ball assembly is fully installed, 2-3 threads on the pipe will still be visible; this is normal. Securely retighten the setscrew with a wrench or pliers.

▲ CAUTION: The adapter has a special coating on the threads. Do not remove this coating; the coating prevents the downrod from unscrewing. Once assembled, do not remove the downrod.

A WARNING: Do not carry or lift fan by canopy.

- 3-4. Raise the fan and place the ball into the hanger bracket.
- 3-5. Align the notch on the ball with the indent in the hanger bracket. (Rotate the fan until you hear the notch pop into place.)

Go to 4 • Wiring the Fan.

۲

A WARNING: Fan may fall if not assembled as directed in these installation instructions.

42501-01 • 01/19/09 • Hunter Fan Company

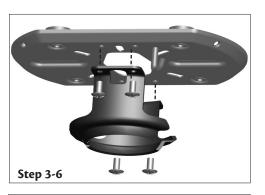

3 • Assembling and Hanging the Fan (Low Profile Only)

۲

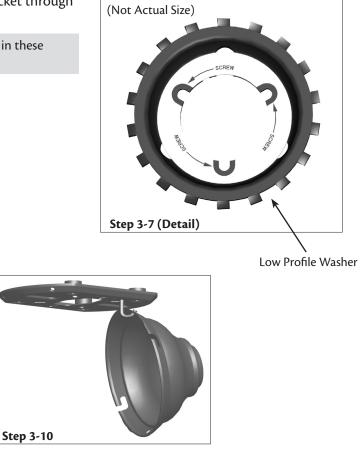

You can assemble your fan for **standard** or **angled** mounting as shown in steps 3-1 – 3-3 on the previous page. For **low profile** mounting (ceilings less than 8 feet high), see steps 3-6 – 3-10 on this page.

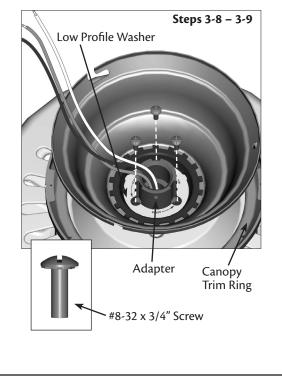

- 3-6. Remove the screws from the hanger ball bracket.
- 3-7. Place the low profile washer from the parts sack into the canopy.
- 3-8. Place the canopy trim ring and canopy with washer on top of the fan assembly.
- 3-9. Align the screw holes in the washer with the holes in the adapter. Assemble securely with three $#8-32 \times 3/4''$ screws.
- 3-10. Raise the fan and place the hook on the hanger bracket through the round hole in the rim of the canopy.

A WARNING: Fan may fall if not assembled as directed in these installation instructions.

۲

4 • Wiring the Fan

۲

All wiring must be in accordance with national and local electrical codes and ANSI/NFPA 70. If you are unfamiliar with wiring, use a qualified electrician.

Wall switches are not included. Select an acceptable general-use switch in accordance with national and local electrical codes.

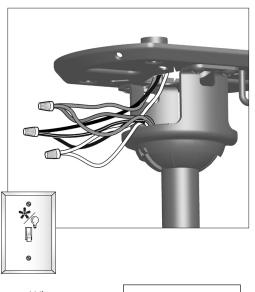

- 4-1. Before attempting installation, make sure the power is still off.
- 4-2. To connect the wires, hold the bare metal leads together and place a wire connector over them, then twist clockwise until tight. For all these connections use the wire connectors provided.
- 4-3. Connect the bare or green ground wire (grounded) from the ceiling to the green ground wire (grounded) from the ceiling plate and the green ground wire from the fan.
- 4-4. Connect the white wire (ungrounded) from the ceiling to the white wire (ungrounded) from the fan.
- 4-5. Connect the remaining wires as follows:

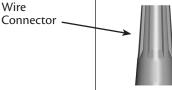

۲

• The black wire (ungrounded) from the ceiling to the black (ungrounded) and the black/white wire (ungrounded) from the fan

A CAUTION: Be sure no bare wire or wire strands are visible after making connections.

- 4-6. Turn the wire connectors upward and push them carefully back through the ceiling plate into the outlet box.
- 4-7. Spread the wires apart, with the grounded wires on one side of the outlet box and the ungrounded wires on the other side of the outlet box.

5 • Installing the Canopy and Canopy Trim Ring

۲

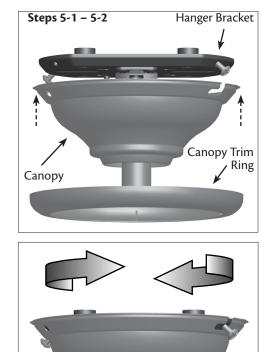

- 5-1. Partially install two canopy screws (about 2 full turns) in the hanger bracket.
- 5-2. Raise the canopy over the hanger bracket. Align partially installed screws with key slots in canopy.
- 5-3. Twist canopy clockwise to secure.

۲

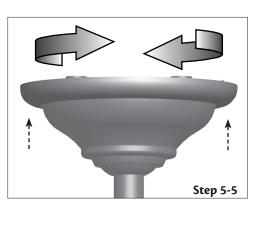

- 5-4. Install third & fourth canopy screw in round hole on canopy. Securely tighten all four screws.
- 5-5. Using both hands, push the canopy trim ring up to the top of the canopy.
- 5-6. Twist canopy trim ring clockwise to secure the canopy.

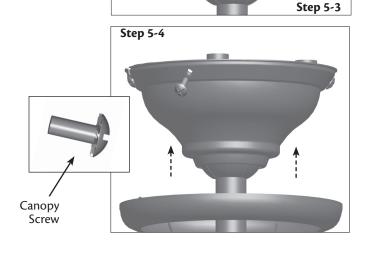

Should you need to remove the canopy trim ring, follow these steps:

1. Twist canopy trim ring counter clockwise until it releases from canopy.

۲

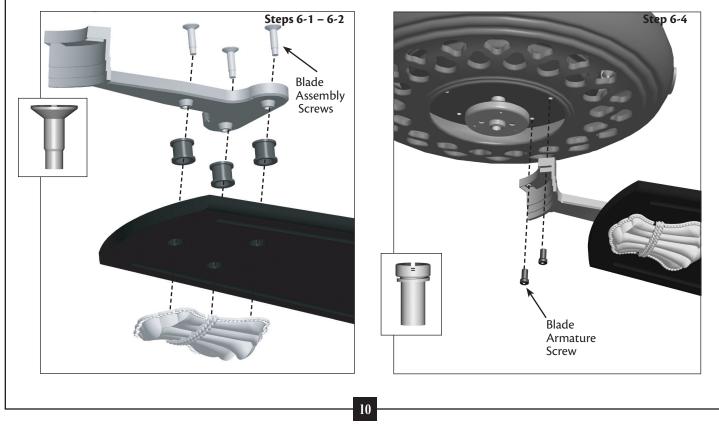

6 • Assembling the Blades

۲

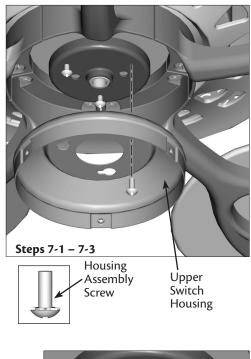

Hunter fans use several styles of fan blade irons (brackets that hold the blade to the fan).

- 6-1. Your fan may include blade grommets. If your fan has grommets, insert them by hand into the holes on the blades.
- 6-2. Install three blade assembly screws through the the blade iron and blade, into the medallion. If you used grommets, the blades may appear slightly loose after screws are tightened. This is normal.
- 6-3. Remove the blade armature screws and rubber shipping bumpers from the motor. Save the screws for the following step and discard the shipping bumpers.
- 6-4. For each blade, insert one blade armature screw through the blade iron, and attach loosely to the fan. Insert the second blade armature screw, then securely tighten both armature screws.

۲

42501-01 • 01/19/09 • Hunter Fan Company

7 • Installing the Switch Housing

۲

- 7-1. To attach the upper switch housing, partially install two #6-32 x 3/8" housing assembly screws into the switch housing mounting plate.
- 7-2. Feed the upper plug connector through the center opening of the housing.
- 7-3. Align the keyhole slots in the housing with the housing assembly screws.
- 7-4. Turn the housing counterclockwise until the housing assembly screws are firmly situated in the narrow end of the keyhole slots. Install the remaining #6-32 x 3/8" screw into the housing. Tighten all three screws firmly.

8 • Setting the Remote Transmitter and Receiver

()

You must now set the jumpers in the remote transmitter and receiver so that they match.

- 8-1. Change the position of the jumpers in the transmitter and the receiver. Be sure the position of the jumper in the transmitter matches the position of the jumper in the receiver. If they don't match, the controller will not function. For instructions on how to set the jumpers, read the box below.
- 8-2. Install the included 12-volt battery into the transmitter.

Setting Jumpers

۲

When two or more fans are located near each other, you may desire to have the receiver/transmitter for each fan set to a different code, so that the operation of one fan does not affect the operation of the other fans.

In the transmitter you can access the jumpers from the battery compartment. The jumpers are very small. You can move them most easily using a small pair of pliers or tweezers. **IMPORTANT!** Before you change a jumper, make sure the battery is not connected to the transmitter.

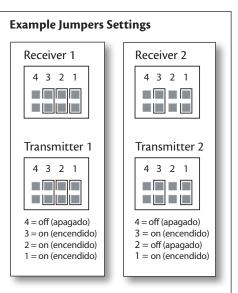

A CAUTION: The remote control device complies with part 15 of the FCC rules. Changes or modifications not expressly approved by Hunter Fan Company could void your authority to operate this equipment.

Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference.
- 2. This device must accept any interference received, including interference that may cause undesired operation.

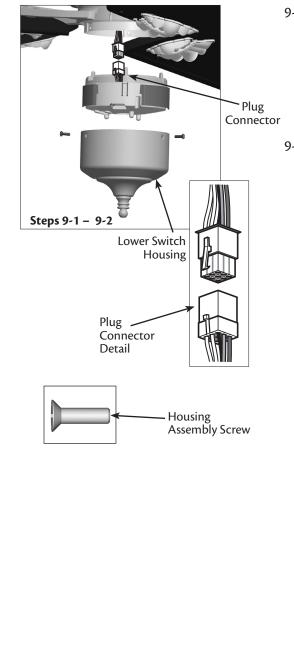

Note: Use with a fan that incorporates an air gap switch (normal on-off wall switch).

A WARNING: Maximum fan load is 1 Amp; maximum lamp is 100 Watts. Do not use any speed control with this product.

۲

()

9 • Completing Your Installation

۲

9-1. To attach the lower switch housing, connect the plug connector from the motor to the plug connector from the receiver in the lower switch housing assembly.

Note: Both plug connectors are polarized and will only fit together one way. Make sure the connectors are properly aligned before connecting them. Incorrect connection could cause improper operation and damage to the product.

۲

9-2. Place the lower switch housing assembly over the upper switch housing. Align the side screw holes in the upper and lower switch housings. Attach the lower switch housing to the upper switch housing with three #6-32 x 1/2" housing assembly screws.

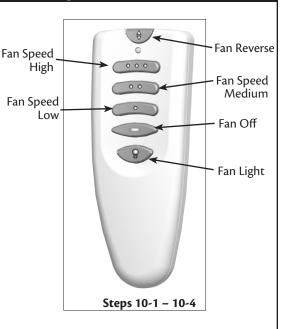

10 • Operating the Remote Control and Mounting the Holder

۲

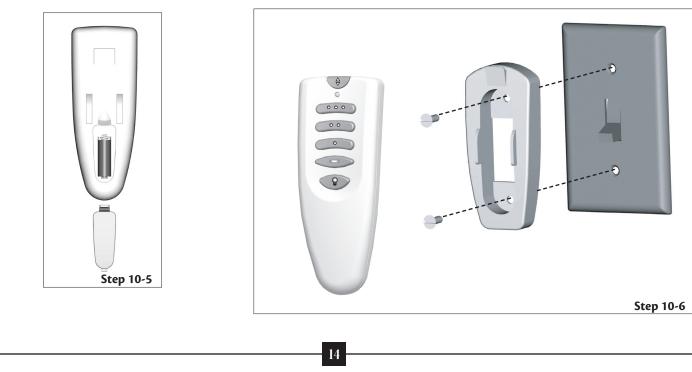

- 10-1. The remote transmitter has individual buttons for turning the fan off and on and controlling the light and fan speed.
- 10-2. For best operation, start the fan by pressing high, then select your desired speed.
- 10-3. The light button turns the light on to full brightness. To dim the light, hold the light button down until you reach your desired brightness. Push the light button again to turn off the light.
- 10-4. Press the OFF button to turn the fan off.

۲

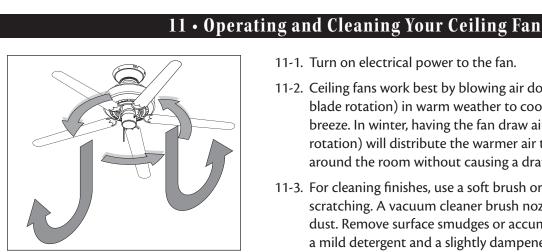

- 10-5. When necessary, replace the battery with a 12-volt type 23A, MN-21 battery or equivalent.
- 10-6. You can mount the remote holder to any toggle switch plate with the screws already in the switch plate. Or, you can simply mount the remote holder on the wall.

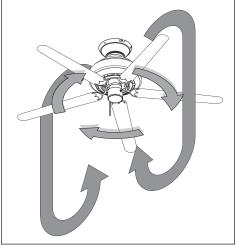

۲

42501-01 • 01/19/09 • Hunter Fan Company

In warm weather, use downward air flow pattern

In cold weather, use upward air flow pattern

11-1. Turn on electrical power to the fan.

()

- 11-2. Ceiling fans work best by blowing air downward (counterclockwise blade rotation) in warm weather to cool the room with a direct breeze. In winter, having the fan draw air upward (clockwise blade rotation) will distribute the warmer air trapped at the ceiling around the room without causing a draft.
- 11-3. For cleaning finishes, use a soft brush or lint-free cloth to prevent scratching. A vacuum cleaner brush nozzle can remove heavier dust. Remove surface smudges or accumulated dirt and dust using a mild detergent and a slightly dampened cloth. You may use an artistic agent, but never abrasive cleaning agents as they will damage the finish.
- 11-4. Clean wood finish blades with a furniture polishing cloth. Occasionally, apply a light coat of furniture polish for added protection and beauty. Clean painted and high-gloss blades in the same manner as the fan finish.

۲

 $(\blacklozenge$

12 • Troubleshooting

۲

Problem: Nothing happens; fan does not move.

- 1. Turn power on, replace fuse, or reset breaker.
- 2. Loosen canopy, check all connections according to the wiring the fan section.
- 3. Check the plug connection in the switch housing.
- 4. Pull the pull chain to ensure it is on.
- 5. Remove the shipping bumpers.

Problem: Noisy operation.

- 1. Tighten the blade bracket screws until snug.
- 2. Check to see if the blade is cracked. If so, replace all the blades.

Problem: Excessive wobbling.

۲

- 1. If your fan wobbles when operating, use the enclosed balancing kit and instructions to balance the fan.
- 2. Tighten all blade iron screws.
- 3. Turn power off, support fan very carefully, and check that the hanger ball is properly seated.

If you need parts or service assistance, please call 888-830-1326 or visit us at our Web site at http://www.hunterfan.com. ۲
