Product Specification:

The aluminum shower storage shall have finished dimensions of 6-3/16" (15.7 cm) in width and 61" (154.9 cm) in height. Product shall include four removable polypropylene shelves and functional shelf cutouts. Product shall be for new construction or complete remodel of tiled showers only. Aluminum shower storage shall be Kohler Model K-1840-_____.

Installation Notes This product is for new construction or complete remodel (down to the stud framing) of tiled showers only. Do not install this product to plastic walls or any other material besides tile.

Install this product according to the installation guide.

Product placement must be determined in advance. Installation requires additional stud reinforcement.

Product protrudes into the pocket stud. The intended pocket stud should be free of plumbing, wiring, or other obstructions.
