Specifications: Designed for residential and industrial use with a broad range of fluid handling applications. This approved Webstone Valve is actuated by a blowout proof stem with a seal that features an adjustable packing nut. The 3 piece design makes in-line repair as easy as 1-2-3. Replacement seats and seals are always in stock and available. B62 bronze is recommended for marine applications. Solder joint temperature ratings are per ASME B16.18 Annex A for 95-5 solder. Other solder materials have lower pressure/temperature limits. Do not silver braze or over heat valves when soldering.
