MAINTENANCE AND CLEANING INFORMATION

The recommended way to clean your sink is by washing with soap or detergent and warm water, ideally after use. The surface can be wiped with a clean soft cloth. This procedure, if carried out regularly should be sufficient to keep the surface clean and stain free. Heavy staining liquids such as dyes and vegetable juices should be washed off as soon as possible. Avoid the use of abrasive cleaners such as scouring pads and steel wool on the sink as such cleaners tend to abrade the surface, which aggravates cleaning.
