SECURITY

The recognized brand of design-accented and lifestyle-enhancing home security products

Introducing SECUREMOTE™ Technology

(patents pending)

SECUREMOTE™ was born from a simple vision: Allow people to operate all their home entry doors, garage doors, and electronic gates from their smartphones.

SECUREMOTE™ blends seamlessly into your lifestyle, bringing unprecedented convenience, control, and security.

Convenience: *Life simplified*

- ✓ Smartphones replace all door remotes
- ✓ Operate multiple doors
- ✓ Share your digital key with other users
- ✓ **Plug n Pair™** connectivity
- ✓ No other connectivity technology required

Control: *Harness the power*

- ✓ Create/Delete users from your smartphone
- ✓ Choose Who/What/When
 - Who has access of which **SECUREMOTE™** device
 - What kind of access (unlimited, temporary, schedule-based)
 - When is access available (schedule by date, day, time)
- ✓ Changes are implemented in real time
- ✓ Know, through email notifications, who is accessing which door
- ✓ Have complete audit-trail of all authorized access events at your finger tips

Security: *Peace of mind wherever you are*

- ✓ Unique and patent pending encryption method
- ✓ Digital key unique to the assigned smartphone(s) and device(s)
- ✓ 128-bit encrypted transmission

SECUREMOTE™ devices and locks do not require integration with complex home network controllers. All features described above are fully functional from a smartphone or First Watch® Online. **SECUREMOTE™** is the only self-contained product of its kind.

Download the free **SECUREMOTE™** application to your smartphone from www.firstwatchonline.com/downloadapp

SECUREMOTE™ Device

Enjoy the benefits of more convenience, control, and security

Put all your overhead garage or gate remote controls into your smartphone (and those of your family members)

Replace door keys and RF remotes with a high-security digital key that works with all major smartphones.

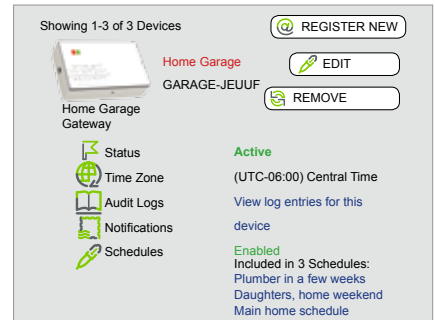

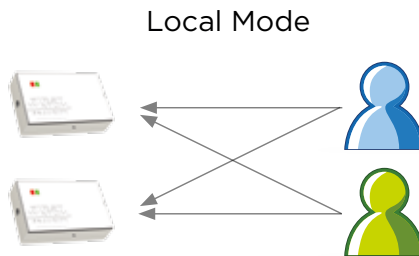

Download the free **SECUREMOTE™** application directly to your smartphone from:
www.firstwatchonline.com/downloadapp

BlackBerry® Android™ iPhone®

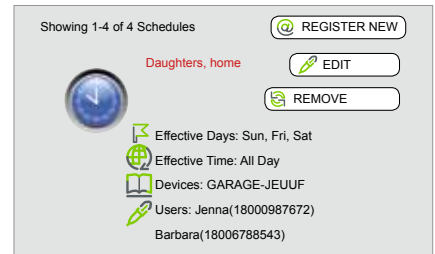

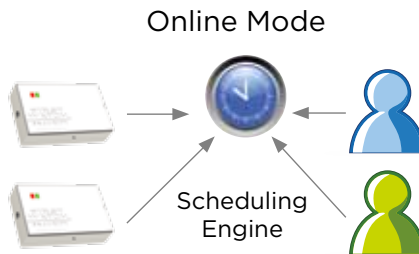

SECUREMOTE™ operation modes:

“Local” mode provides direct access functionality for up to 5 users and unlimited devices directly from the administrator’s smartphone. Users can have unlimited access or temporary access. Local mode does not require a subscription fee.

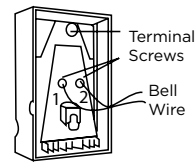

“Online” mode provides a scheduling engine that allows the administrator to associate multiple schedules to multiple users and/or devices. No limit to the number of users or devices. Annual subscription fee is required for more than 10 users or for using the scheduling engine. For more information visit www.firstwatchonline.com

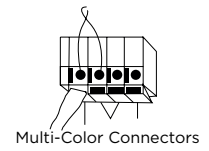

Installation

Plug n Pair™

1. Download the **SECUREMOTE™** application to the smartphone
2. Pair the smartphone to the **SECUREMOTE™** device
3. Connect the **SECUREMOTE™** device to the garage door opener

Typical Wall Control Box

Typical Control Connectors

Connection is simple: Attach the bell wires of the **SECUREMOTE™** device to the wall control box or to the control connectors on the door opener. Then plug **SECUREMOTE™**'s power adaptor into an AC outlet. **SECUREMOTE™** acts as the activation switch.

SECUREMOTE™ will complement an existing overhead garage opener or electronic gate by providing additional functionality and control.

SECUREMOTE™ does not change the function of an overhead garage opener, it only actuates it as if you were to push the wall switch. Therefore, it can work along side with a conventional garage door opener remote or keypad. In such cases however, **SECUREMOTE™** will not register the activation event by a different device.

INTRODUCING FIRST WATCH® ONLINE

The First Watch® Online service allows consumers to extend the capabilities and security of their **SECUREMOTE™** devices beyond what's available "out of the box". By combining the flexibility of web-based user management and authorization along with intelligent notification and auditing capabilities First Watch® delivers unmatched convenience, control, and security.

Primary Features

Centralized User Management/Authorization

Administrators can add any number of authorized users to their First Watch® Online account and can assign schedule-driven authorization rules for each user.

Powerful Notification and Auditing Features

Configurable notification capabilities to alert a select list of individuals via email whenever a device is operated.

Digital Key Security

This key is a proprietary, time-sensitive, 128-bit encrypted digital message that is sent from the smartphone to the **SECUREMOTE™** device via a Bluetooth® signal.

Cloud-Based Technology

Resides entirely in the cloud using *Microsoft® Windows® Azure™ cloud platform, ensuring optimal reliability, performance, and wide-ranging accessibility.

* Microsoft, Encarta, MSN, and Windows are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.

Mobile-Friendly

Web-based interfaces are optimized for display on PC-based web browsers or smartphones.
