WHAT WE PROVIDE

- Mounting Hardware
- Fixture Assembly
- Crossbar
- Glass Shade
- LED Module

WHAT YOU NEED

- Screwdriver
- Wire Cutters
- Wiring Supplies as Specified by Electrical Code

STEP BY STEP INSTRUCTIONS

Before starting your installation disconnect the Power by turning off the Circuit Breaker or by removing the fuse at the fuse box. Just turning the light off at the light switch is not sufficient to prevent electrical shock.

1

PREPARE FIXTURE

If there is an existing fixture remove it.

Expose the supply wires from the J-Box.

Secure the crossbar to the J-box with the supplied screws.

2

CONNECT THE WIRES

Gently pull the supply wires. Connect the black supply wire to the black fixture wire. Secure with the supplied wire nuts. Connect the white supply wire to the white fixture wire. Secure with the supplied wire nuts. Attach the green J-Box wire around green hexagonal head screw or connect it to the green supply grounding wire of the fixture. Secure all wires with U.L. Certified electrical tape (not supplied). Tuck all wires carefully into the J-Box.

3

MOUNT THE FIXTURE

Attach the fixture to the threaded rod protruding from the crossbar and secure with the supplied knurled knob.

In doing so, ensure that the fixture is in an upright position so that the glass shade can slide down into the frame.

4

SECURE THE GLASS SHADE

Attach the glass by sliding it gently into the slots of the fixture until it seats comfortably into position.

5

RESTORE THE ELECTRICITY AND CHECK THE OPERATION OF YOUR NEW ACCESS LIGHTING FIXTURE
