

⚠ WARNINGS AND CAUTIONS

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all times during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

Please Note:

- 120V input

NOTICE

- The important safeguards and instructions outlined in this sheet cannot cover all possible conditions and situations that may occur. It must be understood that caution and certain care factors must be followed. These instructions are provided for your safety and we highly recommend that a licensed, trained electrician install this unit.
- This fixture is designed to be mounted on a correctly installed standard round or octagon box OR through a wiring box with a plaster frame. The box must be securely mounted to the structure of the building. The crossbar and hardware supplied should be used, directly mounting the fixture to the outlet box may make it impossible to correctly align the fixture.

ASSEMBLY INSTRUCTIONS

Step 1

Remove fixture from its original package.

Step 2

Remove the mounting plate (1c) from within the canopy (2a) by loosening the mounting collar nut (2b).

Step 3

Attach mounting plate (1c) to electrical junction box (1a) using junction box screws provided (1e) in hardware package.

Step 4

Attach upper fixture body (3a) to lower fixture body (3b) by threading clockwise, after pulling wires through.

Step 5

Determine hanging height of fixture by selecting from chain supplied (2e). Remove any unwanted length by opening the last link with chain pliers and install the top quick link (2d) to the beginning end of the chain, after weaving fixture wires through chain and secure top quick link (2d) to chain connector (2c) and upper fixture body (3a).

Step 6

Make proper electrical connections (**black to hot "L", white to neutral "N", ground to "GND"**) with wire nuts (1b) provided in hardware package

Step 7

Install the recommended lamp (4a) (not provided) (referred on the socket label for maximum wattage and type) to fixture socket. Secure leaves skewers to fixture body to desired location by threading clockwise (See Page 2 for skewer locations).

Step 8

Attach chain connector (2c) to mounting plate (1c), followed by canopy (2a) and secure with mounting collar nut (2b).

You are now ready to enjoy your fixture.

⚠ WARNINGS AND CAUTIONS

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
