

11034 White Gold

## Metallics

Our Metallics line is pure magic. The luminous glint in each plank comes from metallic powders infused into the stain treatment, similar to those used in the automobile industry. What results is an iridescent floor that catches the light and subtly glows from every angle. The white oak comes in a wide 8" plank that's painted and then wire brushed for texture. It's subdued and brilliant, like a glimmer of light on the water. You have to see it to believe it, trust us.
