

CYPRESS H630 COUNTERTOP SYSTEM

KEY FEATURES

- Powerful three-stage filtration with patented Nanotrap technology
- Triple filter system delivers high quality filtration usually found in more complex undercounter systems
- Elegant slim profile countertop design
- Continuous filtered water (with no wastewater like complex RO systems)
- Ergonomic pushbutton control for dispensing water
- Quick and easy filter replacement
- Fits most standard kitchen faucets with provided adapters
- Standard DIY installation in less than 10 minutes

Brondell's H630 Drinking Water System has been tested and certified by the WQA (Water Quality Association) to comply with NSF/ANSI Standards 42 and 53 for the reduction of the claims specified on the Performance Data Sheet and NSF/ANSI 372 for low lead compliance.
