Option 2: For multiple green (ground), black (live) and white (neutral) wires joined in the electrical box (house wiring), attach a single "green", "black" and "white" jumper wire before connecting. Strip 7mm from the 6" jumper wires supplied. Then connect (push) wires into the correct inserts.

6. Install specified bulb type and wattage (not included).

7. Re-install the bottom cap to the fixture.

8. After installation, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulk. The bottom should be left un-caulked to prevent moisture build-up. Apply a small amount of weather resistant caulk around the side perimeter between the cap nuts and mounting plate.
