

DIMMER COMPATIBILITY LIST

FOR LED VANITIES

COMPATIBLE

MANUFACTURER	PART NO.	TYPE	MAX. LOAD
LUTRON	CTCL-153P	LED/CFL/INCANDESCENT	150W
LUTRON	DVELV-300P	ELECTRONIC LOW VOLTAGE	300W
LUTRON	SELV-300P	ELECTRONIC LOW VOLTAGE	300W
LUTRON	MACL-153M	LED/CFL/INCANDESCENT	150W
LUTRON	DVCL-153M	LED/CFL/INCANDESCENT	150W
LEVITON	6613-P	MAGNETIC LOW VOLTAGE	450W
LEVITON	6615-POW	ELECTRONIC LOW VOLTAGE	300W
LEVITON	IPE04-1LZ	ELECTRONIC LOW VOLTAGE	400W

TROUBLESHOOTING FOR FLICKERING ISSUES

The light may flash when the load is too small on the dimmer. However, most of the dimmers that seem to be affected by this phenomenon are adjustable dimmers.

Here is how to adjust the dimmer:

- 1- Place the dimmer main lever at it's minimum
- 2- Adjust the side lever or thumb-wheel until the flashing disappears.

We have noticed compatibility issues with some LED / CFL specific dimmers, we strongly recommend that your dimmer selection corresponds to our dimmer list or any ELV dimmer.
