B   CONNECT AND ADD SMART LIGHTING PRODUCTS

JUST ASK **amazon alexa**   works with the **Google Assistant**

6. Your device is now connecting to your Wi-Fi network. Place your router, mobile phone, and device as close as possible. If the connection failed, please ensure the last steps were done correctly. Repeat if needed.

7. Your device has been added successfully.

Click on "Done"

8. You can name your devices here. It will help you to organize your devices tree in the menu.

9. Your device will appear on your home screen. You can directly manage all of your lighting products here.

C   LIGHT UP YOUR WORLD WITH DALS

1. You can directly manage all of your lighting products on the menu by toggling On/Off or by clicking on a device for full customization.

2. ACTIONS

"Scenario" let you control multiple devices with one tap or by using an AI speaker through voice commands.

"Automation" execute automatically according to conditions such as the weather, device status, and time.

3. AUTOMATION

Once you clicked on "Add Automation Scenario", select a condition by clicking on the ➕ icon. Same thing for the action. Then enter the period in which the automation will occur.
Edit the name, the picture and click on "Save".

4. ACCOUNT

Set your profil, secure your account, connect to AI speaker such as Google assistant or Amazon Alexa and much more.

works with the Google Assistant
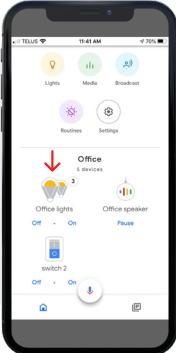

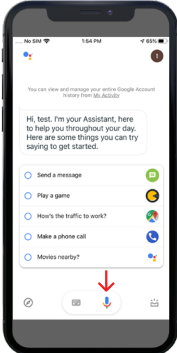

D GOOGLE ASSISTANT

1. Open the Google Home app and click on "Add", then click on "Set up device".

2. Click on "Have something already set up?" in "Works with Google".

**3.** In the search box, enter "Dals Connect" then select it.

**4.** Login with your current account, the same account used during "A4" step.

5. Your Dals smart devices will be listed in the "Home" section. Adding devices to a room enables commands like "turn on the living room lights".
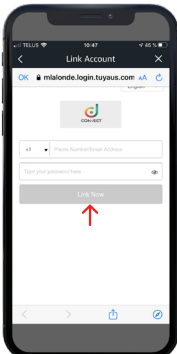

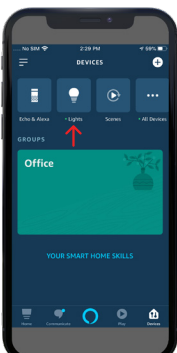

6. Try saying, "Ok Google" then...
- "Turn on light name/ room name"
- "...Dim light name"
- "Brighten light name"
- "Set light name to 20%"
- "Dim/Brighten light name to 50%"
- "Turn light name/room name to red"
- "Turn on/off everything"
- "Is <light name> on?"

E AMAZON ALEXA

1. Open the Amazon Alexa app and click on ≡ at the top left corner, then click on "Skills & Games".

2. In the search box, enter "Dals Connect".

You should see the skill appear in the search results. Tap on the "Dals Connect" skill to enable access.

3. You will need to link your device. Login with your current account, the same account used during "A4" step.

4. Your smart devices will be listed in the "Devices" tab at the bottom of the home screen. Adding devices to a room enables commands like "turn on the living room lights".

5. Try saying, "Alexa" then...
- "Turn on light name/ room name"
- "...Dim light name"
- "Brighten light name"
- "Set light name to 20%"
- "Dim/Brighten light name to 50%"
- "Turn light name/room name to red"
- "Turn on/off everything"
- "Is <light name> on?"
