

❑ R2970-MIX
SPECIFICATION (example)

- Anti-scald three-way under sink thermostatic mixing valve
- Lockable hand wheel for tamper resistant temperature setting
- Integral check valves in hot and cold inlets to prevent crossflow
- Forged brass body construction
- Temperature range 80-120°F (110°F maximum recommended)
- Maximum flow 3.0 gpm, minimum 0.5 gpm, $C_v = 0.55$
- Maximum working pressure 150 psi, minimum 30 psi – Pressure difference between hot and cold shall be less than 20%
- Maximum hot water supply temperature 180°F, minimum 15°F greater than outlet temperature
- Inlets/outlets: 3/8" compression

Approvals:

- CSA certified
- ASSE 1070 and ASSE 1016 certified.
- IAPMO listed
