P/B VALVE INLETS:

1/2" Universal inlets accept 1/2" copper, 1/2" Iron pipe, PEX or CPVC adaptors
 1/2" Male thread inlets/outlets

DIVERTER VALVE:

1/2" FIP inlets/outlets

NOTE FOR SHOWER #6: Not for use as an anti-ligature device.

PAUSE WARNING - FOR SHOWER #5

Plumbing Codes require that showerheads and handshowers provide a small but continuous flow of water (trickle) when in "PAUSE" mode. Because of this continuous flow, in certain circumstances pressure variations in the water line and/or changes in the position of the shower temperature control handle while in "PAUSE" mode could result in dramatic changes to the temperature of the water when the shower head or hand shower is returned to the "ON" position.

ALWAYS point the shower head away from yourself when returning to the "ON" position and feel the water with your hand before resuming your shower to ensure the water flow is not too hot or too cold. DO NOT allow children or others who might not understand this warning to use the "PAUSE" function.

Note: Measurements may vary ± 6mm (0.25")
