Lindale LED Tri-View Medicine Cabinet

PRE-INSTALLATION

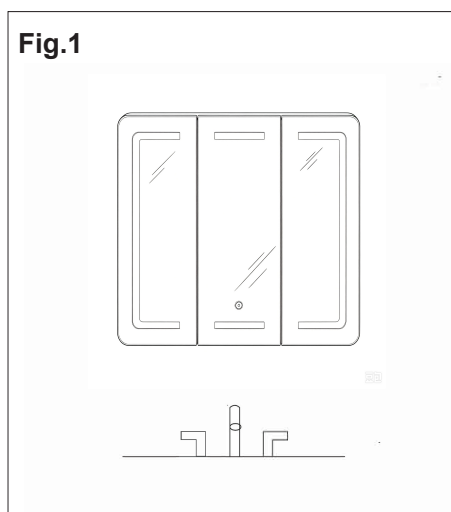

Tools Required

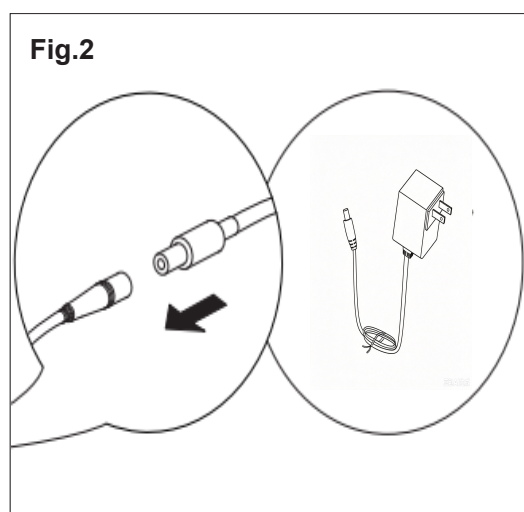

INSTALLATION

Step 1: Determine the desired location of your new cabinet. Make sure the cabinet has sufficient clearance from the faucet and ceiling.

See **Fig. 1**.

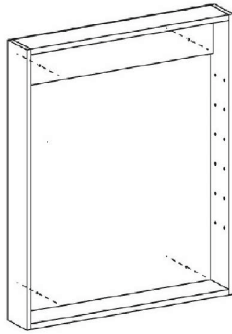

Step 2: Align the DC plug on the power adapter with the DC connector on the cabinet cable. Insert the plug fully to complete the power connection.

STEP 3: SURFACE-MOUNT INSTALLATION

Fig. 3

IMPORTANT: Install the cabinet with the reinforcement board at the top.

1. Determine the desired cabinet location. Position the center of the mirror approximately 64 inches above the finished floor.
2. Drill four 1/8-inch-diameter mounting holes through the back of the cabinet. Drill the two upper holes through the reinforcement board.
3. Hold the cabinet in position. Use a pencil to mark the four mounting-hole locations on the wall.
4. Drill 1/4-inch holes at the marked locations and insert the wall anchors. Insert the 2-inch screws and washers through the cabinet mounting holes and into the wall anchors. Tighten securely. Do not overtighten.

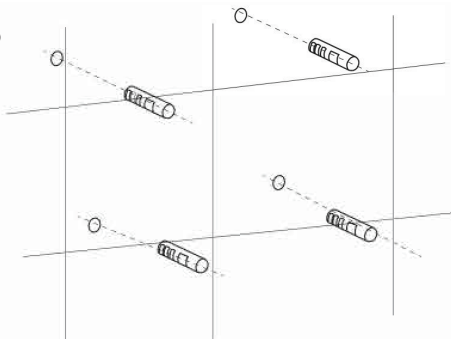

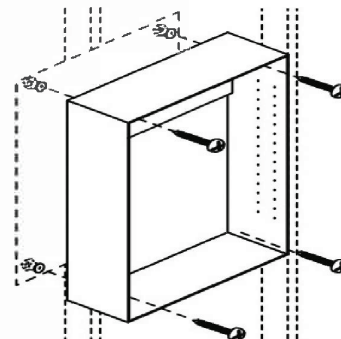

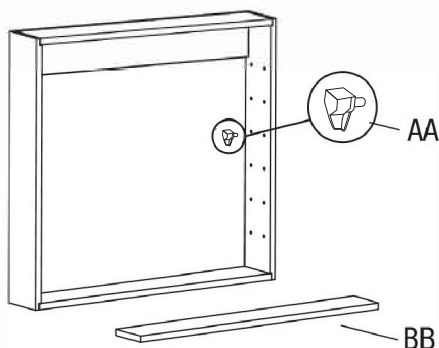

Fig. 6

STEP 4: INSTALL THE SHELVES

Fig. 7

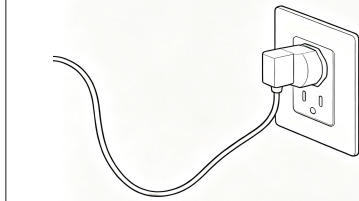

Insert the shelf clips (AA) into the desired holes on the left side of the cabinet.

Insert the corresponding shelf clips into the holes at the same height on the right side.

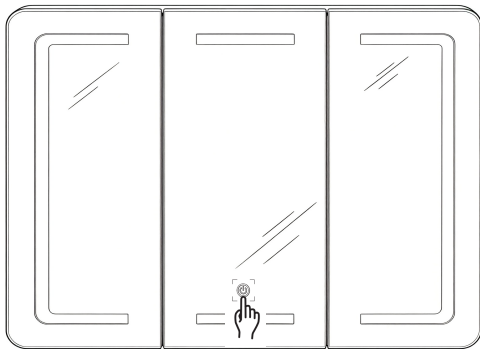

Place the shelves (BB) onto the shelf clips (AA).

Fig. 8

STEP 5: CONNECT THE POWER ADAPTER

After installation is complete, plug the power adapter into a GFCI-protected electrical outlet.

LIGHT CONTROLS

Briefly press the button to change the color temperature. Press and hold the button to adjust the brightness.

WARNINGS

WARNING: KEEP ADAPTER UNPLUGGED

Ensure the adapter remains unplugged from the electrical outlet until installation is complete.

WARNING: ELECTRICAL AND LOCATION SAFETY

Connect this product only to a GFCI-protected electrical outlet installed in accordance with applicable electrical codes. This product is not intended for wet locations. Do not install it where it may be exposed to direct water spray or standing water. Keep all electrical connections dry. Local requirements may vary. Install this product in accordance with all applicable codes and regulations. If you are unsure whether the installation location or electrical connection is suitable, have the installation completed or verified by a qualified electrician.
