Ideal for apartments, townhouses & small to medium sized single family homes

The energy efficient Eccotemp iE27 27Kw Electric Tankless Water Heater is our largest residential model. It is rated at an impressive 3.5 GPM, making it the ideal choice for any standard size home. This model can provide endless hot water to multiple applications, while being equipped with a safe multi-layer heat exchange. The exchange encases the water moving inside the heating element and prevents any possible contact with the elements themselves. This design also protects the heater from sediment buildup to help ensure a long lifetime of providing endless hot water.

Along with the sleek and modern design, the iE series electric tankless water heaters are 96% efficient, and typically result in savings of 15-20% in comparison with electric tank water heaters.

Package Contents

- ✓ 27kw tankless water heater
- ✓ Instruction Manual
- ✓ Installation hardware
