

MFWS200 / MFWS220 MOUNTING FRAME INSTRUCTIONS

1. **Cut a square rectangular wall opening** 37 1/2" (953mm) W x 31 1/2" (800mm) H and 25" (635mm) above the floor line. These dimensions are required to obtain proper rim and bubbler heights for compliance with ANSI standard A117.1.
2. **Reinforce the wall opening** on all sides so that it will adequately support the water fountain. This reinforcement must support up to 150 lbs static load and provide a means for securing the frame assembly in place.
3. **Install plumbing rough-ins.**
4. **Remove frame assembly and related hardware** from packaging. Attach the two frames together thru the upright supports with (4) 5/16" x 3/4" (19mm) long bolts and nuts (provided). Tighten securely.
5. **Install the frame assembly** squarely in wall opening with frame upright support edges flush with the finished wall face. Secure the frame to the wall thru holes with (12) 5/16" bolts or screws (not provided). Tighten securely. **NOTE:** Be sure that frame is squared in location. Do not use less than required screw quantity and size.
