LKB722C Sensor-operated, non-mixing (tempered water), backsplash-mounted gooseneck faucet with adjustable sensor eyes. A continuous beam is emitted from sensor. The sensor faucet is activated by user placing hands under the spout. Tempered water will flow as long as hands remain within sensor range. When hands are removed, the water stops automatically based on shut off delay settings. The sensor then resets and is ready for the next user. Chrome-plated solid brass body construction with 2.0gpm laminar flow control on spout end. Includes water-resistant sensor control module and power cables. Features dual power options: AC plug-in and battery holder with four AA batteries. Slow-closing piston operated solenoid valve, in-line filter with clean-out trap and flexible supply hose.

Control circuit is solid state, has adjustable sensor range of 7/8" (22mm) to 6-3/4" (171mm), shut-off delay preset to 1 second and field adjustable to 2 seconds (to prevent sink overflow).
