Depth	**22 1/4 ″**

FEATURES & BENEFITS

Exceptional Performance

Offering Microwave, Convection, or a combination of both, this oven provides exceptional versatility for every cooking style. Guided by a deep understanding of the Science of Cooking, we've mastered the balance of heat, humidity and airflow to deliver precise cooking methods, from Microwave to Broil, that bring out the full potential of every ingredient. With ActiveVent™ to manage humidity levels, it delivers consistently perfect results in every dish.

Efficient and Delicious

Microwave Assist combines the speed of microwave energy with the power of convection heat to accelerate cooking and enhance the development of colour. Microwaves gently warm from within, allowing food to cook evenly while retaining its natural moisture. A 3.3 lb Chicken roasts 30-40% faster compared to convection alone, with a golden and crisp skin and succulent meat beneath, while root vegetables caramelise beautifully, tender inside with deep and concentrated flavour.

Engineered for Life

Built for enduring performance, our Ovens undergo intensive testing equivalent to 7,300 hours or 20 years of real-world use, delivering durability you can rely on.

Considered Design

Every detail of our Minimal style appliances has been meticulously designed. With a black glass finish, refined handle, and intuitive 5″ touchscreen, every element aligns beautifully. Create your ultimate kitchen solution with our range of ovens and companion products, creating a seamless and cohesive look when installed side by side or stacked, with perimeter gaps as small as 1/16″″. The perfect pairing of style and precision for your kitchen.

Mastery of Temperature

Whether you want to Microwave Popcorn, Roast a Chicken or Melt Chocolate, each of our precise cooking methods has been carefully calibrated with the optimal combination of heat, temperature and microwave energy to cook evenly while preserving texture and flavour. With additional guidance for using the Temperature Sensor, it brings true mastery of temperature to every dish.

Quickstart for Easy Operation

For everyday convenience in an instant, Quickstart Microwave delivers fast, precise results. Simply select the duration and power level, and it's ready to go. Intuitive and effortless, it combines the speed of microwave cooking with the performance and reliability of a premium appliance.

Generous Capacity

The rectangular cavity and absence of a turntable make it easy to cook large dishes, maximising the oven's full 1.7 cu ft capacity. Microwave-safe metal side ladders provide even cooking across all levels, giving you flexibility and consistent results every time.

Connect and Control

Connected cooking brings intelligence and ease to your kitchen. With Wi-Fi and the SmartHQ™ app, you can monitor and control your oven remotely, receive real time notifications, and access helpful guidance. Software updates are delivered through the app to keep your appliance current with the latest features and functionality. Voice control with Google Assistant offers hands free convenience , simply speak to a connected device to open the door. For precise and confident cooking, our temperature sensors provide guidance to help you achieve perfect results.

SPECIFICATIONS

Accessories (included)

Glass tray	1
Grill rack	1 set
Step down wire shelf	1
Wire shelf	1
Wired temperature sensor	1

Capacity

Shelf positions	4
Total capacity	1.7 cu ft
Usable capacity	1.3 cu ft

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
