

Care and Maintenance

FORTIS Faucet, Shower and Accessories

With proper care and maintenance, your FORTIS fixture will give you a lifetime of service. Below are the suggestions for the care and cleaning of your product.

General Cleaning

A soft cloth is ideal for cleaning these products

Under no circumstances should abrasive, caustic or aggressive cleaners be used

Chrome-plated surfaces should be cleaned with a delicate detergent or soap and water

To eliminate limescale, detergents contain mineral acids (for example: hydrochloric acid) or aggressive organic acids (for example: acetic acid) should not be used

We recommend the use of products with a base of citric acid

After cleaning, the products should be thoroughly rinsed and dried carefully
